Easy steps to assemble.

WARNING: The Garden protection kit, Model 47143 is suitable for home garden use. This kit, Model 47143 is not designed for and should NOT be used in applications like, and including, building and construction, quarrying, shipbuilding, forestry and other occupations with similar hazards.

1. Attach the black plastic visor holder on to the helmet by placing the plastic holder over the top of the helmet with the ‘Spring retainer towards the REAR of the helmet.

Locate the brim of the helmet into the channel of the inner plastic holder. This will require the black plastic holder to be spread gently to fit the brim into the channel. Retain the holder in place by picking up the spring retainer and placing it on the rear of the helmet. DO NOT roll the spring retainer into place.

If the spring retainer starts to roll up on the rear of the helmet, PICK UP the spring retainer and roll the spring in your fingers towards the helmet and repeat steps 1-3. Without allowing the spring retainer to unwind, PLACE back on the rear of the helmet.

2. Before attaching the earmuffs, rotate them 180° so they are facing away from the helmet. Attach the earmuffs onto each side of the helmet by inserting into the earmuff fixing holes and pushing down until secure. Then rotate the earmuff back 180° so they are in position to cover your ears.

3. Firstly remove the protective film that is on both sides of the PVC visor face shield. Position the front shield on to the black visor holder and locate onto the centre silver rivet. Slide the shield to the left on the rivet so the shield is located. Adjust the 4 small retaining clips on the Black plastic visor holder so they are pointing to the rear of the helmet and parallel with the visor holder.

4. Carefully curve the plastic shield around the left hand visor holder placing the 2 holes in the visor over the retaining clips. Rotate the visor clips DOWN to retain the front shield. Repeat this for the right hand side.

Ensure all 4 clips are pointing downward with the top of the front shield fully shaped around the black plastic visor holder, carefully shape the lower aluminium edging to a similar curve.

5. To adjust the fit of the helmet to suit, separate the two adjustment bands to disengage the 6 locating pins. Slide the adjustment band through the raised tabs to the left or right, and then push the outer band down over the 6 locating pins to secure. ENSURE the adjustment is locked and is the correct fit for the operator.

Contents of carton

- 1 x Adjustable fit helmet 51 - 63cm
- 1 x Transparent Visor Shield
- 1 x Transparent Visor shield holder
- 1 x Quick Start Guide
- 1 x Pair of Earmuffs
- 1 x Pair of Garden Gloves
- 1 x Warranty Card
- 1 x Adjustable fit helmet 51 - 63cm
- 1 x Transparent Visor Shield
- 1 x Transparent Visor shield holder
- 1 x Quick Start Guide

NOTE: To adjust the positioning of the earmuffs to suit, move the earmuff up or down.

Unpacking

Due to modern mass production techniques, it is unlikely that your Garden Protection kit is faulty or that a part is missing. If you find anything wrong, do not use the product until the parts have been replaced or the fault has been rectified. Failure to do so could result in serious personal injury.

WARNING! The Garden protection kit, Model 47143 is suitable for home garden use.

This Kit, Model 47143 is not designed for and should NOT be used in applications like, and including, building and construction, quarrying, shipbuilding, forestry and other occupations with similar hazards.

To work right: A helmet must fit right and be worn right

WARNING! ALL SAFETY EQUIPMENT HAS LIMITS. READ THE HELMET SECTION CAREFULLY AND FOLLOW THE INSTRUCTIONS COMPLETELY.

SCOPE OF USE AND USE RESTRICTIONS:

Safety helmets are intended primarily to provide protection to the wearer against falling objects and consequential brain injury and skull fracture. The helmet is made to absorb the energy of an impact by partial destruction or damage to the shell or harness. Even though such damage may not be readily apparent, any helmet subjected to a severe impact should be replaced immediately. The helmet should not be adapted for the purpose of fitting attachments in any way not recommended by the manufacturer.

HELMETS CAN’T PROTECT WHAT THEY DON’T COVER:

A helmet protects only what it covers. It does not protect the neck or any areas of the head it doesn’t cover. Always wear a helmet low in the front to protect the forehead. Make sure the helmet fits snugly and the straps are adjusted to hold the helmet firmly in place when tightly fastened. ENSURE the adjustment is locked and is the correct fit.

YOU SHOULD ALWAYS:

1. Wear your helmet low in the front to protect the forehead.
2. Fasten your buckles and tighten your chinstrap.
3. Check your adjustments every time you wear your helmet.
4. Inspect your helmet regularly for signs of wear or damage.
5. Replace your helmet immediately if it shows any visible signs of wear or damage. Helmets have a limited life span of use.
6. Replace your helmet after an accident, even if no damage is visible.

YOU SHOULD NEVER:

1. Wear a helmet that’s been in an accident, even if no damage is visible.
2. Wear your helmet with the buckle unfastened.
3. Wear your helmet tilt back to expose your forehead.
4. Wear anything under your helmet.
5. Wear this helmet while operating a motor vehicle.
6. Use the helmet if the manufacturer did not recommend replacement parts or accessories.
7. Clean your helmet with a chemical cleanser.
8. Store your helmet in hot and damp places.
9. Take unnecessary risks just because you’re wearing a helmet.

CLEANING AND DISINFECTING

The helmet may be cleaned with mild detergent and warm water and dried with a soft cloth. The helmet should not be cleaned with abrasive substances or solvents.

FITTING AND ADJUSTMENT

For adequate protection the helmet must fit or be adjusted to the size of the wearer’s head. The helmet must be worn with the peak facing forward.

To alter the size, adjust the strap at the rear of the helmet to tighten or loosen. To change the wearing height, alter the position of all 4 holders on the harness. Ensure that a comfortable fit is made around the crown of the head.

WARNING!

A helmet must fit right and be worn right

To work right:

1. Wear a helmet that’s been in an accident, even if no damage is visible.
2. Wear your helmet with the buckle unfastened.
3. Wear your helmet tilt back to expose your forehead.
4. Wear anything under your helmet.
5. Wear this helmet while operating a motor vehicle.
6. Use the helmet if the manufacturer did not recommend replacement parts or accessories.
7. Clean your helmet with a chemical cleanser.
8. Store your helmet in hot and damp places.
9. Take unnecessary risks just because you’re wearing a helmet.

DEADLINE OF OBSOLESCENCE

The date of manufacture is marked under the peak of the helmet. The period of use of this helmet depends on:

1. Shelf life = 3 years, when kept in stock, the helmet must be stored from heat and from any sources of light.
2. Service life = 2 years, when this helmet is in use and under normal use.

STORAGE

When not being used or during transportation, this helmet should be stored in a container out of direct sunlight. Away from chemical solvents and abrasive substances and where it will not be damaged by physical contact with hard surfaces/objects.

NOTE: this kit is only for Home garden use and not for use in building / construction applications etc.
