Read all safety warnings and all instructions thoroughly before operating this product. Ensure you keep your manual in a safe place for future reference.
QR codes take you where you want to go quickly and easily

Whether you require product information, spare parts or accessories, details on warranties or aftersales service, or if you want to watch a product demonstration video, our QR codes will take you there in no time at all.

What is a QR code?
A QR-code (QR=Quick Response) is a type of matrix that can be read with a smartphone camera and that contains a link to a website or contact details, for example. Advantage: You are not required to manually enter a website address or contact details.

How it works
To scan the QR code, all you need is a smartphone with QR codes reader software and an Internet connection*. This type of software can be downloaded for free from your smartphone’s app store.

Try it out now
Just scan the QR code with your smartphone and find out more about the Aldi product you have purchased*.

* Depending on your tariff you may be charged for the connection.
Congratulations on the purchase of your GARDENLINE® 173cc 4 Stroke Petrol Lawn Mower. When you open your packaging, first remove all items and check there are no parts damaged or missing. If you find anything wrong, do not operate the product until the parts have been replaced or the fault has been rectified. Failure to do so could result in serious personal injury.

**Intended use of the 173cc Petrol Lawn Mower**

**NOTE:** This product is for private domestic DIY use only. It is not suitable for commercial, industrial or trade use. This product is suitable for private home use i.e for use in home and gardening environments, for the application of mowing.

**IMPORTANT INFORMATION.**

**NOTE:** This is a 4 stroke Lawn Mower. The engine MUST be filled with 560ml of SAE 10W/30 BEFORE starting. Fresh unleaded fuel must be used in this unit. **DO NOT use Ethanol based fuels. Do NOT mix oil with fuel.**

**NOTE:** First time users or inexperienced operators pay particular attention to the operation of the Lawn Mower, including details of starting and stopping the mower on pages 30, correct use of the Lawn Mower on pages 27-29, and maintenance on pages 33-37.

**Contents of carton**

- 1 x Lawn Mower
- 1 x Hard Catcher (not fitted)
- 1 x Side Discharge Chute (not fitted)
- 1 x Spark Plug Wrench
- 1 x 51314 20V Xfinity Li-Ion Battery
- 1 x Plug Pack Charger
- 2 x Drink Holder Cups (not fitted)
- 2 x Upper Handle Locking Levers (not fitted)
- 1 x Lawn Mower
- 1 x Hard Catcher (not fitted)
- 1 x Side Discharge Chute (not fitted)
- 1 x Spark Plug Wrench
- 1 x 51314 20V Xfinity Li-Ion Battery
- 1 x Plug Pack Charger
- 2 x Drink Holder Cups (not fitted)
- 2 x Upper Handle Locking Levers (not fitted)

**Description of symbols**

The rating plate on your product may show symbols. These represent important information about the product or instructions on its use.

- Conforms to relevant standards for electrical safety and electromagnetic compatibility.
- Wear hearing protection. Wear eye protection.
- Wear breathing protection.
- Wear safety footwear.
- Wear safety gloves.
- Warning.
- Do not crush, disassemble, short terminals or dispose in fire; there is a risk of burns explosion or fire.
- Do not put in water.
- Do not charge the battery pack if the ambient temperature is less than 0°C or greater than 45°C.
- Indoor use.
- Double Insulation. There are two independent barriers of insulation to protect you from the possibility of electrical shock.
- MEPS.
- Polarity.
- Read these instructions for use carefully.
- Use at a distance of at least 15m from other people.
- Thrown objects can cause severe injury.
- Explosive material.
- Extremely hot surface. Do not touch a hot muffler, gear box or cylinder, you may get burned. These parts get extremely hot from operation and remain hot for a short time after the unit is turned off.
- Before carrying out any operation stop the engine and disconnect the spark plug.
- Risk of hand and feet injuries.
- Waste electrical products should not be disposed of with household waste.
- Noise label rating 74dB(A) (taken at 7.5 metres).
- You must wear ear protection at all times.
General Safety Warnings

Safety instructions

**WARNING** Read and understand all instructions. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury. The term “power tool” in all of the warnings below refers to your mains-operated (corded) power tool, garden power tool, battery-operated (cordless) power tool or your petrol operated garden tool.

Save these instructions

Work area

- Ensure the area to be mowed is clear and free of debris, rocks, gravel, garden furniture etc.
- Keep work area clean and well lit. Cluttered and dark areas invite accidents.
- Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust. Power tools create sparks which may ignite the dust or fumes.
- Ensure all animals, children and bystanders are at least 15m away while operating this lawn mower. Distractions can cause you to lose control.

Personal safety

- Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol, or medication. A moment of inattention while operating power tools may result in serious personal injury.
- Use safety equipment. Always wear eye protection. Safety equipment such as a dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- Remove any adjusting key or wrench before turning the tool on. A wrench or a key that is left attached to a rotating part of the power tool may result in personal injury. Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.
- Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.
- If devices are provided for the connection of dust extraction and collection facilities ensure that these are connected and properly used. Use of these devices can reduce dust-related hazards.

Power tool use and care

- Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
- Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- Turn tool off completely before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.
- When not in use, store power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.
- Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool’s operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.
- Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- Use the power tool, accessories and tool bits etc., in accordance with these instructions and in the manner intended for the particular type of power tool, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from intended could result in a hazardous situation.

Service

- Have your power tool serviced by a qualified repair personnel using only identical replacement parts. This will ensure that the safety of the power tool is maintained. Agent (Refer to page 41 for information relating to finding your nearest Service Agent).
Training
• Read the instructions carefully. Get familiar with the controls and proper use of the equipment.
• Only use the lawn mower for the purpose for which it was designed, i.e. for cutting and collecting grass. Any other use can be hazardous, causing damage to the machine.
• Never allow children or people unfamiliar with these instructions to use the lawn mower. Local regulations may restrict the age of the operator.
• Never use the lawn mower:
• When people, especially children, or pets are nearby.
• If the operator has taken medicine or substances that can affect his ability to react and concentrate.
• Remember that the operator or user is responsible for accidents or hazards occurring to other people or their property.

Preparation
• While mowing, always wear sturdy footwear and long trousers. Do not operate the equipment when barefoot or wearing open sandals.
• Thoroughly inspect the area where the equipment is to be used and remove all objects which may be thrown by the machine or damage the cutter assembly and the engine (stones, sticks, metal wire, bones, etc.)

**WARNING: DANGER!**
Engine fuel is highly flammable.
• Store fuel in containers specifically designed for this purpose.
• Refuel using a funnel and outdoors only.
• Do not smoke while refuelling or whenever handling the fuel.
• Never refuel near an open flame.

Operation
• Do not operate the engine in a confined space where dangerous carbon monoxide fumes can collect.
• Mow only in daylight or good artificial light.
• If possible, avoid operating the equipment in wet grass.
• Always be sure of your footing on slopes.
• Walk, never run and do not allow yourself to be pulled along by the lawn mower.
• Mow across the face of slopes, never up and down.
• Exercise extreme caution when changing direction on slopes.
• Do not mow on slopes of more than 20°.
• Exercise extreme caution when pulling the lawn mower towards you.
• Stop the blade if the lawn mower has to be tilted for transportation when crossing surfaces other than grass, and when transporting the lawn mower to and from the area to be mowed.
• Never operate the lawn mower with defective guards, or without safety devices, such as the stoneguard and/or grass-hard catcher, in place. Replace if damaged.

• Add fuel before starting the engine. Never remove the cap of the fuel tank or add fuel while the engine is running or when the engine is hot.
• If fuel is spilled, do not attempt to start the engine but move the machine away from the area of spillage and avoid creating any source of ignition until the fuel has evaporated and the vapour dispersed.
• Replace all fuel tanks and containers caps securely.
• Substitute faulty silencers.
• Before use, always inspect the machine, especially the condition of the blades, and check that the screws and cutting assembly are not worn or damaged. Replace worn or damaged blades and screws in sets to preserve balance.
• Discharge openings must be guarded at all times. Do not remove the discharge guard or hold it up while mowing.
• It is advisable to wear suitable eye protection when operating the mower.
• Ensure upper and lower handles are secured in position before operation by manually tightening knobs and/or levers by hand per the assembly instructions.
• Do not change the engine governor settings or overspeed the engine.
• On power-driven models, disengage the drive clutch before starting the engine.
• Start the engine carefully, following the instructions and keeping feet well away from the blade.
• Do not tilt the lawn mower when starting the engine.
Start the engine on a flat surface that is free of obstacles and tall grass.
• Do not put hands or feet near or under rotating parts. Keep clear of the discharge opening at all times.
• Never pick up or carry a lawn mower while the engine is running.
• Stop the engine and disconnect the spark plug wire:
  - Before carrying out any work underneath the cutting deck or before unblocking the chute;
  - Before checking, cleaning or working on lawn mower;
  - After striking a foreign object. Inspect the lawn mower for damage and make repairs before restarting and operating the lawn mower;
  - If the lawn mower starts to vibrate abnormally (find and remove the cause of the vibration immediately).
• Stop the engine:
  - Whenever you leave the lawn mower unattended.
  - Before refuelling.
  - Every time you remove or replace the grass-hard catcher.
• When mowing, always keep to a safe distance from the rotating blade. This distance is the length of the handle.
• Never cut grass while walking backwards.
• Stop the engine before pushing mower across gravel drives, walks or roads.
• This machine is to be used exclusively for cutting natural grass. Never use the mower for other purposes. Any other utilization can involve danger for your safety and can involve damage to the mower.
• The user is responsible for the safety of other people, animals and objects in the working area. Keep children and domestic animals at a safe distance while the mower is in use.

Maintenance and Storage
• Keep all nuts, bolts and screws tight to be sure the equipment is in safe working condition. Regular maintenance is essential for safety and performance.
• Never store the equipment with fuel in the tank inside a building where vapour may reach a flame or a spark or a source of extreme heat.
• Allow the engine to cool before storing in an enclosed space.
• To reduce the fire hazard, keep the engine, exhaust silencer, battery compartment and fuel storage area free of grass, leaves, or excessive grease. Do not leave containers with grass cuttings in rooms.
• Check the stone-guard and grass-hard catcher frequently for wear and deterioration and replace if damaged.
• If the fuel tank has to be drained, this should be done outdoors and when the engine is cool.
• Wear strong work gloves when removing and reassembling the blade.
• Check the blade’s balance after sharpening.
• For reasons of safety, do not use the equipment with worn or damaged parts. Parts are to be replaced and not repaired. Parts that are not of the same quality can damage the equipment and be dangerous for your safety.
• Whenever the machine is to be handled, transported or tilted you must:
  - Wear strong working gloves;
  - Grasp the machine at the points that offer a safe grip, taking account of the weight and its distribution.
• Damaged blades and worn bolts are major hazards.
• Fuel goes off in about 3 - 4 months. If you find your mower does not start, try changing the fuel in the tank with newly purchased fresh unleaded fuel. **Do not use ethanol based fuels.**
Operation Safety Instructions

⚠️ WARNING: Stop the engine and unplug the spark plug before any repairs or maintenance operations.

- Check that all nuts, bolts and screws are well tightened before every use.
- Before mowing ensure that the blade and the blade fixing screws are securely fastened. When the blade edges require re-sharpening, this must be done evenly on both sides to prevent any imbalance. If the blades are damaged, it must be replaced.
- When mowing always wear long trousers and strong, covered footwear.
- Do not run the engine in an enclosed and/or poorly ventilated area. The gas of the engine contains carbon monoxide, which is dangerous to your health.
- Work only when there is sufficient light.
- Do not use the lawn mower when it is raining or when the grass is wet.
- Caution must be taken while mowing on slopes. Mow across the face of slopes, never down or up.
- Turn off the engine if you must leave the lawn mower unattended.
- Never lift the rear of the mower while starting the engine and never place your hands and feet underneath the deck while the engine is running.
- If working on high grass, adjust the mowing height to reduce the friction and prevent over loading. The optimal mowing height should be 1/3 the height of the grass. It would affect the work efficiency of lawn mower if too much higher or lower.
- Never change the rated speed of the engine in any way.
- Never lift or carry the mower while the engine is running.

- Stop the engine and remove the spark plug cover in these cases:
  - Before any operation under the deck.
  - Before any maintenance, repairing or checking operations.
  - Before carrying, lifting or removing the mower.
  - If you leave the mower unattended or change the cutting height.
  - After hitting a foreign object, stop the engine and check thoroughly the mower in order to see if it is damaged. Take the mower to an authorised service centre to carry out any repairs if necessary.
  - If the mower vibrates in an abnormal way, take the mower to an authorised service centre.
  - Check the bolts and nuts regularly. Bolts and nuts may vibrate loose over time.

⚠️ WARNING: Fuel is highly flammable.

- Keep fuel in a jerry can specially made for this purpose.
- Fill the fuel tank with a funnel and outside. Do not smoke or use a mobile phone during this process.
- Fill with fuel and oil before starting the engine. Never open the cap of the fuel tank to add fuel while the engine is running or still hot.
- Do not start the engine if there is spilt fuel on the mower or in the area surrounding. Take the mower away from the zone where fuel has been split and avoid any contact from a hot source as long as the split fuel is completely evaporated.
- Tighten the fuel tank cap and jerry can cap tightly.
1. Never mow while barefoot or wearing open sandals, or thongs. Wear long trousers and heavy shoes.
2. Know your controls. Read the owner’s manual carefully. Learn how to stop the engine quickly in any emergency.
3. Make sure the lawn is clear of sticks, stones, bones, wire and debris. They could be thrown by the blade.
4. Stop the engine and disconnect spark plug wire (on internal combustion engines) or disconnect the mower from the mains (on electric mowers) before clearing blockages, checking or working on the mower.
5. Before using, always visually inspect to see that blades, blade bolts and cutter assembly are not worn or damaged. Replace worn or damaged blades and bolts in sets to preserve balance.

**DAMAGED BLADES AND WORN BOLTS ARE MAJOR HAZARDS.**

6. Check all nuts, bolts and screws often; always be sure the mower is in safe operating condition. Use only replacement parts made and guaranteed by the original manufacturer of your mower.
7. Refuel outdoors only. Do not smoke while fuelling engine. Add fuel before starting the engine. Never remove the cap off the fuel tank or add petrol while the engine is running or the engine is hot. If petrol is spilled, do not attempt to start the engine but move machine away from the area of the spill and avoid creating any source of ignition until petrol vapours have dissipated.
8. Do not mow whilst people, especially children, or pets are in the mowing area.
9. Replace worn or faulty silencers.
10. Mow only in good daylight.
11. Never use the mower unless the grass hard catcher, or guards provided by the manufacturer, are in position.
12. Start the engine carefully with feet well away from the blades.
13. Do not operate engine in a confined space where exhaust fumes (carbon monoxide) can collect.
14. Stop the engine whenever you leave the mower, even for a moment.
15. Do not allow children or people unfamiliar with these instructions to use the mower.
16. Store the mower in a well-ventilated room away from naked flames such as may be found in hot water heaters.
17. Never use an electrically powered mower in the rain or when grass is wet.
19. Do not over-speed the engine or alter governor settings. Excessive speed is dangerous and shortens mower life.
20. It is advisable to wear suitable eye protection when operating a mower.
21. Turn the fuel off at the conclusion of mowing and reduce the throttle setting during engine run-out.
22. Store fuel in a cool place in a container specifically designed for the purpose.
   In general, plastics containers are unsuitable.
23. Stop the engine, disconnect the spark plug wire or mains power cord, as applicable, and inspect the mower if—
   (a) the mower begins to vibrate abnormally; or
   (b) after striking a foreign object.
24. Never cut grass while walking backwards.
25. Stop the engine before pushing mower across gravel drives, walks or roads.
27. Mow across the face of slopes, never up and down. Exercise extreme caution when changing direction on slopes. Do not mow excessively steep slopes.
28. Never pick up or carry a mower when it is operating
Safety Rules for Charger & Batteries

a) Use only the charger and batteries supplied in this pack.
b) Protect the charger and battery pack against moisture including rain and high humidity.
c) Always check that the power cord is correctly connected before using the charger.
d) When you are not using the charger, remove the plug from the mains socket. Do not pull the plug out by the power cord.
e) Handle the battery pack carefully. Do not let it fall or be subject to impact.
f) Always remove the plug from the power socket before you clean or maintain the charger or battery pack.
g) Do not charge the battery pack if the ambient temperature is less than 0°C or greater than 45°C.
h) Do not short circuit the battery pack. A short circuit gives rise to a heavy current causing overheating and the possibility of fire or explosion.
i) Do not connect a cable to the battery pack terminals.
j) Make sure that no metal objects such as a nail, paper clip or coin finds its way into the charging socket.
k) A damaged battery pack or one which no longer holds its charge must be disposed of in a special way and not placed for normal household rubbish collection.
l) Never throw a battery pack into a fire or into water.
m) Keep handles dry, clean and free from oil and grease. Slippery handles do not allow for safe handling and control of the tool in unexpected situations.

n) This product should only be started by using ALDI XFINITY batteries only; models 51314 or 55756. Other Battery models will be available from time to time but use only models marked as XFINITY 20V.

NOTE: This unit may not be used by people (including children) with reduced physical, sensory or mental capacities, with a lack of experience and without the appropriate knowledge, unless they are supervised by someone who is responsible for their safety or have been instructed by such a person with regard to how the unit is to be operated.

Children should be supervised to ensure that they do not play with the device.
**Intended use of the 173cc Petrol Lawn Mower**

**NOTE:** This product is for private domestic DIY use only. It is not suitable for commercial, industrial or trade use. This product is suitable for private home use i.e for use in home and gardening environments, for the application of mowing and mulching grass.

This lawn mower offers various functions to accommodate different lawn mowing requirements.

1. **Hard catcher Mowing** – standard lawn mowing with hard catcher attached.
2. **Side Discharge Mow** - Using the side discharge chute, grass clippings are ejected from the mower on the right hand side of the deck. The rear hard catcher should not be used when the side discharge is used.
3. **Mulch and Mow** - Using the mower without the hard catcher attached; the lawn mower will mulch as it cuts and the fine grass clippings are distributed back onto the grass surface without leaving piles of grass clippings.
4. **Electric Start** - The electric start feature operates with an ALDI Xfinity 20V Lithium-Ion battery to provide effortless starting.
Parts List

1. Upper handle bar
2. Hard catcher attachment bar
3. Battery Compartment
4. Key Set
5. Battery Release tab
6. Key Start Battery system charging cable
7. Tool and refreshment holder (2 x drink holders)
8. 51314 20V Xfinity Li-ion Battery
9. Lower handle
10. Upper handle bar locking lever (x 2)
11. Lower handle locking knob (x 2)
12. Lower handle mounting plate
13. Hard catcher
14. Mulching Block
15. Hard catcher attachment bracket
16. Rear discharge guard
17. Rear wheels
18. 8 Height adjustment lever
19. Blade mounting plate
20. Side discharge chute
21. Side ejector cover
22. Engine
23. Oil drain plug
24. Oil filler cap/dipstick
25. Fuel tank
26. Fuel tank cap
27. Spark plug cover / Spark Plug (located under cover)
28. Air filter
29. Air filter cover
30. 2 x Blades
31. Blade bolt
32. Outer Flange + washer
33. Front wheels
34. Spark plug spanner
35. Nudge Bar
36. Battery Charger Adaptor
37. Plug Pack Charger

AFTER SALES SUPPORT

AFTER SALES SUPPORT

e-mail: help@powertoolsupport.com
MODEL No.: DM46E3P-D173 • 02/2018 • 59085
WARNING: Stop the engine and unplug the spark plug before any repairs or maintenance operations.

WARNING: DO NOT attempt to start this mower without first adding 560ml of SAE 10W/30 engine oil to the Engine.

WARNING: Do Not attempt to start this mower without the mower first being FULLY assembled.

It is necessary to fit the lower handle (9), upper handle bar (1), and hard catcher (13).

**Attaching the Lower Handles**

**NOTE:** When preparing for this assembly, remove the upper and lower handle bars from the box ensuring the key start battery system charging cable (6) does not become tangled or crossed over. Damage to the cable can affect performance of the engine. After removing from the packaging box, lay the handles in position for assembly as shown in Fig A. The key start battery system charging cable (6) needs to be aligned down the right hand side of the mower. Ensure during assembly the cable is above the handles, not on the underside of the handles.

**NOTE:** The key start battery system charging cable (6) is already held in position to the upper handle bar with 4 cable clips, as indicated by the arrow.
Attaching the Lower Handles continued.

1. Once the handles are set up as shown in Fig A, remove the 2 x lower handle locking knobs (+ bolt/s, curved washers & circle washers) (11) from your accessory bag (Fig B). Place the lower handle in position to assemble by aligning the 2 x lower handle ends on the outer side of the lower handle mounting plates (12).

2. Once in position, insert the bolt on each side through the lower handle mounting plate (12) from the inside of the mounting plate (12) through to the outside of the lower handle (9) (Fig C).

**NOTE:** You may need to support the lower handle to engage the bolt through as shown in Fig C on the left.

3. Once the bolts are loosely in position, fit the plastic curved washer over the end of the bolt, then the circle washer (Fig D), then screw the lower handle locking knob (11) over the circle washer and secure by turning clockwise until tight and secure (Fig E).

Attaching the Upper Handle Bar to the Lower Handle

With the lower handle (9) in position, the upper handle bar (1) can now be secured in position.

**IMPORTANT:** Again ensure the cable is not tangled or crossing over before applying the upper handle bar (1).

1. Remove the 2 x upper handle locking levers (+ curved washer/s, circle washers & locking knobs) (10) from your accessory bag (Fig F).

2. Align the ends of the upper handle bar (1) on the external side of the lower handle (9) such that the holes in the ends of the upper handle bar (1) align with the holes in the top of the lower handle (9).

3. Insert the upper handle locking lever (10) bolt through the upper handle bar (1), then through the lower handle (9). When in position repeat on the opposite side to keep the upper handle bar (1) sturdy in position (Fig G).

4. Apply the curved washer, circle washer and locking knob on the internal side of the lower handles (9), push the locking lever down towards the handle bar, then tighten the locking knob until secure (Fig H).

**NOTE:** Tension on the upper handle locking lever/s (10) can be adjusted by rotating the lever knob (Fig I).

**NOTE:** Repeat Step 4 EACH time the lawn mower is operated to make sure tension remains stable on the handles / knobs / levers, ensuring they do not become loose due to vibration.
Assembly of the Hard Catcher
The hard catcher (13) is supplied in 2 sections. Locate the top half of the hard catcher on top of the bottom half and interlock them together by aligning the clips on the top half of the hard catcher into the raised ridge around the bottom half of the hard catcher, then push the halves together until they click into place. (Fig J)

Attaching the Hard Catcher
1. Lift the rear discharge guard (16) in order to position the assembled hard catcher (13).
   NOTE: Do NOT ever start the lawn mower if the rear discharge guard does not fully return to the close position if the hard catcher is not fitted.
2. Apply the hard catcher (13) by aligning the hard catcher attachment bar (2) on the hard catcher over the hard catcher attachment bracket (15) centrally so the hard catcher is sitting evenly.
3. Release the rear discharge guard (16) to secure the hard catcher (13) into place. (Fig K)
   NOTE: Always empty the hard catcher before it has reached maximum capacity, otherwise it will decrease the performance of the lawn mower.
   TIP: Do not leave grass clippings in the hard catcher for extended periods of time, and ensure there is no build up in the ridges connecting the hard catcher halves together.
   NOTE: Ensure that any grass clippings or dirt are removed from the channel within the hard catcher attachment bracket when removing and re-attaching the hard catcher in between uses.

Assembly of the Side Discharge Chute
WARNING: Ensure the engine is NOT operating when fitting the side discharge chute (20).

Do not operate or have the engine running when the side ejector cover is opened and the discharge chute is not fitted.

NOTE: The side discharge chute (20) is used to distribute grass clippings from the side of the mower while the mower is in use. To use this function, the hard catcher (13) is NOT required to be assembled on the lawn mower.

1. This side ejector has a lock to ensure it is secured when not in use. Push the lock tab in an upwards direction to disengage the lock, then using your other hand, lift up the side ejector cover (21) to be able to position the side discharge chute (20) onto the side of the deck of the lawn mower. (Fig L)
2. Place the side discharge chute (20) into position on the side of the deck by aligning the 2 top tabs on the side discharge chute (20) with the bars on each side at the top of the side ejector cover (21), and then place the 2 top tabs underneath the bars to secure (Fig M). Release the side ejector cover (20). (Fig N)
3. To remove the side discharge chute (20), raise the side ejector cover (21), and remove the side discharge chute (20). Lower / release the side ejector cover (21).

NOTE: For the best performance in “side discharge chute” mode, insert the mulching block (14). See Mulch and Mowing instructions page 27.
Battery Charging
This lawnmower is equipped with electric start and uses ALDI Xfinity 20V powered batteries to start the product.
Battery Model 51314 is provided with the product. All Xfinity 20V batteries are compatible including model 55756.
The charger provided with this product is a standard charger.
IMPORTANT: Before attempting to charge the battery, check the battery charger adaptor (36), plug pack charger (37), and the 51314 20V Xfinity Li-ion Battery (8) to ensure the charging equipment matches the battery supplied. The components are all labelled with component numbers.
NOTE: The 51314 20V Xfinity Li-ion Battery (8) needs to be removed from the lawn mower for charging.
CAUTION! The 51314 20V Xfinity Li-ion Battery (8) may require charging at first use. A full charge will require approximately 5-7 hours.

Preparation
1. Connect the battery charger adaptor (36) into the plug pack charger (37) (Fig O).
2. Connect the plug pack charger (37) in to the 240V mains power outlet. A "green" light indicates power (Fig P).
3. Slide the battery charger adaptor (36) onto the battery (8) by aligning the guiding rails. A click indicates the battery is fitted (Fig Q).
4. The plug pack charger (37) light will change to “red”. The battery is now in the charging process.
When the light returns to “green”, the battery (8) is fully charged. (Fig P).
NOTE: The power to the charger should be turned off when unattended, with or without a battery inserted.

Mulch and Mowing
Using the mower without the hard catcher (13) attached, the lawn mower will mulch as it cuts and the fine grass clippings are distributed back onto the grass surface without leaving piles of grass clippings.

WARNING:
Ensure the engine is NOT operating when undertaking this task.
1. Remove the hard catcher (13) by lifting the rear discharge guard and releasing the hard catcher (13). (Fig R)
2. Lift the rear discharge guard (16), insert the mulching block (14) into position by pushing in the right side then the left side, then engage the 2 x lock pins on the bottom of the mulching block with the 2 holes on the bottom of the rear of the discharge chute, then release and close the rear discharge guard (16) (Fig S).
NOTE: To remove the mulching block, you can only do so by taking the left side out first and then right side.

3. Ensure the side ejector cover (21) is in the closed position.
Do NOT use the side discharge chute (20) when mulch and mowing.
4. To remove the mulching block (14) after use, lift it up from the bottom, then outwards to remove (Fig T).

Adding and Checking the oil
IMPORTANT: The engine of this lawn mower is packed with NO OIL in the engine. Prior to starting the engine, oil MUST be added to the sump of the engine.
Failure to add sufficient oil will result in damage to the engine which is NOT covered under the warranty of the lawn mower.
On a new lawn mower, the engine needs to be filled with 560ml of SAE 10W/30 engine oil. We recommend GÄRDENLINE® Full Synthetic 4 Stroke Oil.
Each time the lawn mower is used, the oil level should be checked and if low, add sufficient oil to ensure the oil level is to the full mark on the dipstick.
1. Position the lawn mower on a flat and level surface. Clean the area directly around the oil filler cap (24).

2. Remove the oil filler cap / dipstick (24) by turning approximately a quarter turn in an anti clockwise direction and lift the cap outwards. Clean the oil dipstick (24) with a clean cloth, cleaning away any visual oil (Fig U).

3. FOR A NEW LAWN MOWER, add 560ml of 4 stroke SAE 10W/30 engine oil.

4. Insert the oil dipstick back and secure the oil filler cap (24) by turning approximately a quarter turn in a clockwise direction.

5. Again remove the oil dipstick (24) and check the oil level. It should be at the top of the full (H marking) indicator on the dipstick (Fig V).

6. If low, add oil slowly into the engine oil fill. Do not overfill. After adding oil, wait one minute and then recheck the oil level.

7. Replace and tighten the oil filler cap / dipstick (24). Always ensure the oil filler cap is firmly locked in place before the engine is started.

**NOTE:** Do not allow engine to run low on oil as it will reduce the life of the engine.

**NOTE:** Do not overfill with oil above the full indicator mark.

**Fueling**

**IMPORTANT:** Fuel goes off after about 3-4 months. If you find your lawn mower does not start, first change the fuel in the tank with newly purchased fresh unleaded fuel. **Do not use ethanol based fuels.**

**WARNING.** Do not refill fuel tank while engine is running or is hot.
- Be careful not to admit dust, dirt, water or other foreign objects into the fuel.
- Wipe off spilt fuel thoroughly before starting engine.
- Ensure you DO NOT fuel the lawn mower in close proximity to any open flames, lit cigarettes, or hot objects.

1. Unscrew the fuel tank cap (26) and pour fresh unleaded fuel into the tank with the aid of a funnel. (Fig W)

2. Fill the tank to approximately 2.5 cm below the lowest portion of the neck to allow for fuel expansion. Be careful not to overfill or spill any fuel. If this happens, wipe the spill with a clean rag.

3. Start the engine at least 3 metres away from the area where the fuel tank has been filled in order to avoid the risk of fire.

**Adjusting the Cutting Height**

The mower has one lever to easily adjust the cutting height. There are 8 height settings.

**NOTE:** Always try to adjust the cutting height of the lawn mower while positioned on the area of grass you plan to mow.

It is recommended to start on a higher setting and mow a trial area of lawn before deciding on the final cutting height position. Then readjust if necessary.

1. To increase the cutting height pull the height adjustment lever (18) outward towards the wheel, and move it up a notch, towards the rear of the lawn mower. (Fig X)

2. To decrease the cutting height pull the height adjustment lever (18) outward towards the wheel, and move it down a notch, towards the engine. (Fig Y)

3. After adjustment, ensure the lever is fully located in the selected notch.
**Operation**

Starting the Engine (Electric / Key Start)

**NOTE:** Before starting the mower check the oil and fuel levels. The engine MUST be filled with 560ml of SAE 10W/30 engine oil BEFORE starting. Fresh unleaded fuel must be used in this unit.

**DO NOT use Ethanol based fuels. DO NOT mix oil with fuel.**

Warranty will be void if the engine becomes faulty due to insufficient oil and fuel levels.

For starting, ensure the mower is set to the highest height setting so the blades are not resting deep into the grass.

**NOTE:** The engine of this lawn mower has an automatic choke start and operation feature, and no priming bulb, hence no priming or choke adjustment is required before starting the engine.

1. Ensure the battery (8) is charged. If not, refer to the “Battery Charging” section of the manual.
2. Insert the battery (8) into the battery compartment (3) at the rear of the tool and refreshment holder (7). A click will be heard when the battery has engaged (Fig Z).
3. Turn the key (4) to the right to the “START” position to start the lawn mower engine. The engine should start. (Fig AA). Release the key (4) as soon as the engine starts. The key will automatically move to the “ON” position.

Stopping the engine

1. To stop the engine, move the key (4) to the left to the “OFF” position. (Fig AB).

EMERGENCY STOPPING

If you have turned the key (4) and the lawnmower fails to stop, do not panic - there are two other safe stopping methods available for you to try. Do not put fingers or hands anywhere near the cutting deck.

The safest method is to wheel the lawn mower to a safe area and allow the lawn mower to continue to run until the fuel has been all used up.

An alternative to this where the user is confident, is to remove the spark plug cap by pulling it from the spark plug (27) (Fig AC). This removes the engine’s ability to fire and run.

However it is recommended to wear a rubber glove when grasping the spark plug cap as a small electric shock is possible when pulling the cap off.

Ensure you feel confident to do this. If not, simply allow the lawnmower to run out of fuel.

**CAUTION:** The spark plug may be hot.

Persons with heart conditions or any medical condition which can be affected by electric shock should not attempt this method.

Do not attempt to restart the lawnmower and contact your local service agent and book a repair of the product.

Do NOT lift the lawn mower. Do NOT tilt the lawn mower.

Do NOT leave the running lawn mower unattended.

Do NOT put hands under the running lawn mower under any circumstances.

Mowing advice

1. Before mowing always check and clear the grassed area for all foreign objects, especially solid ones semi-concealed in the ground such as rocks, stumps and garden stakes.
2. Sharp blades cut cleanly and efficiently; if the blades are dull it will tear the grass. This will result in the ends of the grass turning brown. When the blades no longer cut cleanly either sharpen them or replace them.
3. To safely operate the mower ensure all four wheels are on the ground and be careful not to lose your footing or control of the mower. Be very careful when mowing uneven or rough ground. Keep a firm grip on the handle bar at all times, always walk, never run with the lawn mower.
4. For healthy growth, grass should not be cut too short. The grass will remain healthier, greener and require less watering.
5. Vary your cutting pattern from week to week, this will help to prevent matting and graining of the grass.
6. If using the mulching function, and grass is piling up behind the lawn mower during the cutting action, lift the lawn mower to the next cutting height using the height adjustment lever (18).

**Engine tipping**

**NOTE:** Always ensure the engine is switched off and the spark plug cap is removed before undertaking this task.

When cleaning, or performing any maintenance such as replacing the blades, it is very important that the lawn mower is ONLY tipped backwards. (Fig AD). Failing to do so will result in engine damage. Should this occur, the mower should be taken to a lawn mower repair shop which is not covered under warranty.

**Poor engine performance**

Should the engine idle or run rough at full speed with excessive bluey/black smoke emanating from the muffler, it is possible that the engine was slightly tipped incorrectly (refer above). If the mower has been tipped, allow the engine to run for a few minutes and the excess oil will burn out.

If the engine is not running at full speed, check the fuel is fresh, check the oil level, and also inspect under the deck to ensure there is no build up of grass.

Check the spark plug. If the mower continues to underperform, take the mower to your nearest an authorised Service Agent.

---

**Replacing the Blades**

**NOTE.** Before making any adjustment or maintenance procedures to the lawn mower ensure it is turned off and the spark plug lead is removed.

**NOTE.** Wear heavy gloves to protect your hands.

1. With the engine switched off, remove the hard catcher (13) and lift the front of the lawn mower upward so the upper handle bar (1) sits on the ground and the spark plug faces upwards.
2. Remove the blade bolt (31) using a 17mm spanner (not supplied) by turning in an anti-clockwise direction (Fig AE), then remove the outer flange and washer (32) (Fig AF). This allows you to be able to remove the blade mounting plate (19) from the lawn mower.
3. To remove a single blade from the blade mounting plate (19), again use a 17mm spanner (not supplied) to loosen and remove the nut, screw and washer. (Fig AG/AH)

**NOTE:** There is 1 washer located under the screw on the outer side of the blade mounting plate (19). Be careful not to lose this (Fig AI).
4. Repeat the process to remove the other blade.
5. Clean the dirt and grass from around the blade mounting area.
6. Replace both blades to ensure a smooth even cut and re-fit them on the mower in the reverse direction they were removed.
7. Lastly, secure the nuts firmly, (20-25Nm) repeating this for the other blade.
8. Replace the blade mounting plate (19) with new blades attached, then the outer flange (32), followed by the blade bolt (31). Retighten the blade bolt tightly (50 – 59Nm).

**NOTE:** Use a wooden block to stop the blade from turning. The blades should be tightened fully but check to ensure they can still swing back if they were to hit a solid object. Where required tighten the bolts with a torque wrench, the centre disc blade bolt torque: 50 – 59Nm and the four blades torque: 20-25Nm. If you do not have a torque wrench ask a mower service dealer to tighten the blade bolts before you use the mower.

Blades should be replaced when they become worn and no longer cut the grass cleanly. The performance of grass catching can also reduce if the blades become worn. Replacement blade sets are available for purchase from www.extrabattery.com.au, or by calling 1800 909 909.

**Removing Oil**

**IMPORTANT:** Drain the oil while the engine is still warm to ensure rapid and complete draining.

1. With the engine off but still warm, disconnect the spark plug cover and make sure it is kept away from the spark plug (27).
2. Remove the oil drain plug (23) bolt (Fig AJ), using a 10mm spanner (not supplied) in an anti-clockwise direction to loosen (Fig AK).

**WARNING:** Oil may be hot.

3. Drain the oil into a suitable / approved container for the disposal of oils and the like.
4. After the oil has drained, install and tighten the oil drain plug (23) bolt.
5. Wipe up any spilt oil.
6. To refill the oil tank, follow the process on page 27.

**NOTE:** Please dispose of used engine oil in a manner that is compatible with the environment. We suggest you take it in a sealed container to your local service station for reclamation. Do not throw it in the trash or pour it into the earth.

**Air Cleaner Maintenance**

The air cleaner system uses a pleated filter.

**IMPORTANT** A dirty air filter (28) will restrict air flow to the carburettor.

To prevent carburettor malfunction, service the air filter (28) regularly. Check that the air filter (28) is clean and dry of dirt.

Filters thick with debris will not allow the engine to breathe and result in difficult starting and poor engine performance.

The air filter (28) should be checked after approximately 25 hours of use, or annually.

1. Open the air filter cover (29) by pushing in the rear tab (right hand side) to release the clip, and then pushing the cover back and away to release the 2 front clips (Fig AL).
2. Open the air filter cover (29) and remove the air filter (28). (Fig AM)
3. To loosen debris, gently tap the air filter (28) on a hard surface. If the filter is excessively dirty, replace with a new filter.
4. Wash the filter in liquid detergent and water. Then allow it to thoroughly air dry. Do not oil the filter.
5. Re-install the air filter (28).
6. Close the air filter cover (29) and secure the fastener.
CAUTION. Never use fuel or low burning paint solvents to clean the filter. A fire or explosion could result.

CAUTION. Clean the filter in a solution of household detergent and warm water. Ensure the filter is dry before refitting.

Replacement air filters are available for purchase from www.extrabattery.com.au, or by calling 1800 909 909.

Spark plug
To ensure the engine is operating correctly, the spark plug (27) must be properly gapped and free of carbon deposits. Always check the spark plug cable is firmly fitted to the top of the spark plug. The spark plug should be changed after approximately 25 hours of use, or annually.

CAUTION. If the engine has been running, the muffler will be very hot. Be careful not to touch the muffler.

1. Remove the spark plug cap (27) (Fig AN). With the supplied spark plug spanner (34) remove the spark plug (Fig AO), and clean any deposits from the spark plug (27) with a rag or damp cloth.
2. Visually inspect the spark plug (27). Discard the spark plug (27) if there is apparent wear, or if the insulator is cracked or chipped.
3. Check that the end of the spark plug (27) is not blackened by carbon build up. Clean with a soft wire brush if necessary.
4. Measure the plug gap with a feeler gauge. Correct as necessary by bending the side electrode. The gap should be 0.7 - 0.8mm.
5. Thread the spark plug (27) in by hand to prevent cross-threading.
6. Once the spark plug (27) is seated, tighten with the supplied spark plug spanner (34) to compress the washer.

NOTE. When installing a new spark plug, tighten 1/2 turn after the spark plug seats to compress the washer.

7. Replace the spark plug cap. ENSURE the cable to the cap is in the TOP position and is clear of the carburettor rod.

CAUTION. The spark plug must be securely tightened. An improperly tightened spark plug can become very hot and may damage the engine. Replacement spark plugs are available from purchase from lawn mower or small engine repair shops.

Transporting

WARNING: Ensure the engine is not running and has cooled before transporting.

WARNING: If the engine must be tipped to transport equipment or to inspect or remove grass, keep the spark plug upwards.

When transporting the lawnmower, the upper handle bars can be folded down over the lower handles. To do this, disengage the lever/s from the secure position, then loosen the knob on the upper handle bar locking lever/s (10) until they are loose and allow the handle to be folded down over the lower handle (9).

NOTE: Ensure the cable is not tangled or folded as this can cause damage to the cable.

When the mower is ready to be used again, unfold the upper handle bar and re-tighten the upper handle bar locking lever/s (10) per instructions on page 23.

Transporting or tipping the engine spark plug down may cause:
• Smoking
• Difficulty starting
• Spark plug fouling
• Oil saturation of the air filter

Ensure the storage area is free from excessive humidity and dust. Drain the fuel tank and carburettor.

WARNING. Fuel is extremely flammable and explosive under certain conditions.

Do not smoke or allow flames or sparks in the area.

Note. Be aware to not hit or cut the fuel tank while you are transporting.
Storage

- When you finish working, clean the engine completely, making sure there is no grass or dirt on the engine.
- Store the engine away from direct sunlight.
- At the end of the season, give the engine an overall cleaning and a thorough check.
- Whenever the machine is not used for a long period of time, proceed as follows:
  - Empty the fuel tank completely.
  - Empty the carburettor bowl of all fuel by starting the lawn mower and letting it stop when the fuel is all used in the bowl.
  - Protect all metal engine parts from corrosion by coating them with oil.
  - Completely change the engine oil.
  - Coat areas that may rust with a light film of oil. Cover the engine and store it on a level surface in a dry, dust free area.
  - When storing the lawnmower, the upper handles can be folded down over the lower handles. To do this, disengage the lever/s from the secure position, then loosen the knob on the upper handle locking lever/s (10) until they are loose and allow the handle to be folded down over the lower handle (9).

NOTE: Ensure the cable is not tangled or folded as this can cause damage to the cable.

When the mower is ready to be used again, unfold the upper handle and re-tighten the upper handle locking lever/s (10) per instructions on page 23.

Warranty

Your new GARDENLINE® 173cc 4 Stroke Petrol Lawn Mower will more than satisfy your expectations. It has been manufactured under stringent GARDENLINE® Quality Standards to meet superior performance criteria. You will find your new 173cc 4 Stroke Petrol Lawn Mower easy and safe to operate, and, with proper care, it will give you many years of dependable service.

CAUTION. Carefully read through this entire instruction manual before using your new GARDENLINE® 173cc 4 Stroke Petrol Lawn Mower. Take special care to heed the Cautions and Warnings.

Your GARDENLINE® 173cc 4 Stroke Petrol Lawn Mower has many features that will make your job faster and easier. Safety, performance, and dependability have been given top priority in the development of this 173cc 4 Stroke Petrol Lawn Mower, making it easy to maintain and operate.

Use only GARDENLINE® replacement parts for your product. Non-conforming parts or modifications made to parts will void your warranty.

Environmental protection

Recycle unwanted materials instead of disposing of them as waste. All tools, hoses and packaging should be sorted, taken to the local recycling centre and disposed of in an environmentally safe way.

Dispose of used engine oil in a manner that is compatible with the environment. We suggest you take it in a sealed container to your local service station for reclamation. Do not throw it in the trash or pour it into the earth.

What your 3 year warranty means

Great care has gone into the manufacture of this product and it should therefore provide you with years of good service when used properly.

In the event of product failure within its intended use over the course of the first 3 years* after the date of purchase, we will remedy the problem as quickly as possible once it has been brought to our attention. In the unlikely event of such an occurrence, or if you require any information about the product please contact us via our after sales support services, details of which can be found in this manual and on the product itself. After Sales Support TEL: 1800 909 909 or email: help@powertoolsupport.com

* 3 year warranty applies for the lawn mower and battery charger.
1 year warranty applies for the 20V Lithium-Ion Battery (51314)
Accessories and After Sales parts

Should you find the following accessories are worn or past their user life, replacements can be purchased online via our website www.extrabattery.com.au

1. Replacement 4 x Swing Blades (59085-BL)
2. Replacement Side Discharge Chute (59085-SDC)
3. Replacement Charger Base + Plug Pack Charger (JLH122200370S / Z10)
4. Replacement 20V Li-Ion Battery (51314/A200)*
5. Replacement Mulching Block (59085-MB)
6. Replacement Spark Plug (LG F7RTC)
7. Replacement Air Filter (59085-AF)

* blade mounting plate not included
* Note that Xfinity Battery 55756 is also compatible with this product.
Note that Xfinity Charger 51323 is also compatible with this product.

If you have any queries regarding these accessories, please call us on our Customer Support Line: 1800 909 909.

Service Support

If you have any issues with the operation of your product, please take it with a copy of your receipt to one of our National Service Agents for repair. A listing of our Service Agents is included with your product, however, you can also find our most updated listing by visiting powertoolsupport.com, and clicking on the Service Agent link. Alternately call us on our Customer Support line, 1800 909 909, for advice or support.
Technical Specifications

Lawn Mower Specifications

Engine: 173cc Four Stroke
Engine Capacity: 173cc
Bore: 70 mm
Stroke: 45 mm
Speed: 2800 min⁻¹ +/- 15%
Fuel Type: Unleaded petrol
Oil Type: 4 Stroke Engine Oil SAE 10W/30
Fuel Tank Capacity: 1.8L
Oil Tank Capacity: 560ml
Width of cut: 460mm (18”)
Blades: 2 x swing back blades
Height adjustment: 8 Levels
Spark Plug Type: LG F7RTC
Equivalent Replacement Spark Plug: NGK BPR6ES
Hard Catcher Capacity: 55 Litres
Weight (NW): 36.7 kg
Noise label rating: 74dBA (taken at 7.5 metres)
You must wear ear protection at all times.
Product Dimensions: 1860 x 560 x 1185mm +/- 10% (L x W x H)
This product complies with: Safety Report AS 2657:1985
EMC EN ISO 14982:2009

Battery and Charger Specifications

Battery: 20V --- 2.0Ah/Li-Ion
Battery Model Number #: 51314 / A200
Other Compatible Xfinity Battery Model #: 55756 20V 2.0Ah Lithium-Ion Battery
Charger Adaptor Model #: Z10
Plug Pack Charger Model #: JLH122200370S
Charging time: Ready for use in 5-7 Hours
NOTE: Xfinity Charger model # 51323 is also compatible with this product.
ALDI guarantees that our exclusive brand products are developed to our stringent quality specifications. If you are not entirely satisfied with this product, please return it to your nearest ALDI store, within 60 days from the date of purchase, for a full refund or replacement, or take advantage of our after sales support by calling the supplier’s Customer Service Hotline.
