Read all safety warnings and all instructions thoroughly before operating this product. Ensure you keep your manual in a safe place for future reference.
QR codes take you where you want to go quicky and easily

Whether you require product information, spare parts or accessories, details on warranties or aftersales service, or if you want to watch a product demonstration video, our QR codes will take you there in no time at all.

What is a QR code?
A QR-code (QR=Quick Response) is a type of matrix that can be read with a smartphone camera and that contains a link to a website or contact details, for example.
Advantage: You are not required to manually enter a website address or contact details.

How it works
To scan the QR code, all you need is a smartphone with QR codes reader software and an Internet connection*. This type of software can be downloaded for free from your smartphone’s app store.

Try it out now
Just scan the QR code with your smartphone and find out more about the Aldi product you have purchased*.

* Depending on your tariff you may be charged for the connection.
**45W Staple / Nail gun**

**Warranty details**

The product is guaranteed to be free from defects in workmanship and parts for a period of 36 months from the date of purchase. Defects that occur within this warranty period, under normal use and care, will be repaired, replaced or refunded at our discretion. The benefits conferred by this warranty are in addition to all rights and remedies in respect of the product that the consumer has under the Competition and Consumer Act 2010 and similar state and territory laws.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Congratulations on the purchase of your FERREX® 45W Staple / Nail Gun. When you open your packaging, first remove all items and check there are no parts damaged or missing. If you find anything wrong, do not operate the product until the parts have been replaced or the fault has been rectified. Failure to do so could result in serious personal injury.

Application
First time users or inexperienced operators must pay particular attention to the operation of the 45W Staple / Nail Gun, including details of starting, stopping and the correct use of the 45W Staple / Nail Gun on page 13. Maintenance instructions are also detailed on page 13.

Intended use of 45W Staple / Nail Gun
NOTE: This product is for private domestic DIY use only. It is not suitable for commercial or trade use. This 45W Staple / Nail Gun is used for tacking fabrics, leather, card board, foils, insulation material and other light weight materials to soft structural surfaces, such as wood or wood-like materials. The 45W Staple / Nail Gun is not suitable for fastening wall or ceiling panelling. The 45W Staple / Nail Gun is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse.

Contents of carton
1 x 45W Staple / Nail Gun
400 x Staples (□ 10 mm)
100 x Nails (T 15 mm)
1 x Instruction Manual
1 x Warranty Card & Certificate
Description of symbols
The instruction manual or rating plate on your product may show symbols. These represent important information about the product or instructions on its use.

To reduce the risk of injury, user must read instruction manual

Wear ear protection
Wear eye protection
Wear breathing protection

Conforms to relevant standards for electrical safety and electromagnetic compatibility.

Double insulation

36 Month Warranty Period.

The box is recyclable at kerbside.
General safety warnings

WARNING Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1) Work area safety
   a) Keep work area clean and well lit. Cluttered or dark areas invite accidents.
   b) Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   c) Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2) Electrical safety
   a) Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
   b) Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
   c) Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
   d) Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
   e) When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.
   f) If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.
3) Personal safety
   a) Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
   b) Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
   c) Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
   d) Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
   e) Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.
   f) Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.
   g) If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of these devices can reduce dust-related hazards.

4) Power tool use and care
   a) Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
   b) Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
   c) Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.
   d) Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.
   e) Maintain power tools. Check for misalignment or binding of moving
parts, breakage of parts and any other condition that may affect the power tool’s operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.

f) **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

5) **Service**
   a) Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

6) **Recommendation**
   a) It is recommended this 45W Staple / Nail Gun be used with a residual current device with rated residual current of 30mA or less. Use of an RCD reduces the risk of electric shock.
Tacker safety warnings

1. **Always assume that the tool contains fasteners.** Careless handling of the tacker can result in unexpected firing of fasteners and personal injury.

2. **Do not point the tool towards yourself or anyone nearby.** Unexpected triggering will discharge the fastener causing an injury.

3. **Do not actuate the tool unless the tool is placed firmly against the workpiece.** If the tool is not in contact with the workpiece, the fastener may be deflected away from your target.

4. **Disconnect the tool from the power source when the fastener jams in the tool.** While removing a jammed fastener, the tacker may be accidentally activated if it is plugged in.

5. **Use caution while removing a jammed fastener.** The mechanism may be under compression and the fastener may be forcefully discharged while attempting to free a jammed condition.

6. **Do not use this tacker for fastening electrical cables.** It is not designed for electric cable installation and may damage the insulation of electric cables thereby causing electric shock or fire hazards.

7. **This 45W Staple / Nail Gun must be used with a residual current device with rated residual current of 30mA or less.** Use of an RCD reduces the risk of electric shock.
Parts List

1. Safety switch
2. Trigger
3. Lever for loading magazine
4. Staple observation window
5. Nail / staple head
6. On/off switch
7. Magazine
8. State nail gauge
9. Staples (10 mm)
10. Nails (15 mm)
Assembly

WARNING! Please read and understand this instruction manual before use and keep it for your future reference. Your power tool should only be passed on together with this instruction manual.

WARNING: Switch off the machine and unplug before inserting nails (10) and staples (9).

To load nails (10) and staples (9) (See Fig A1-A4)

1) Turn the staple / nail gun upside down to access the magazine (7).
2) Press the lever for loading magazine (3) and pull out the state nail gauge (8) toward the rear.
3) Insert the staples (9) or nails (10) strip into magazine (7) with nails (10) or staples (9) pointing upwards (maximum capacity 50 staples (9) or 50 nails (10))

NOTE: Nails (10) are to be inserted on either side of the magazine.
4) Insert the magazine (7) again until it engages.
**Operation**

1. **On/off switch (6) (See fig. B)**
   Plug the power cord into the mains power supply and turn the switch on.
   To **start** the machine, press down the On/Off switch (6) on the position marked “I”.
   To **switch off** the machine, press down the On/Off switch (6) on the position marked “O”.

   ![B](image)

   **WARNING**: Switch off the machine and disconnect it from the power source immediately when not in use.

2. **To operate the staple gun (See fig. C)**
   1) Firmly press the nail/staple head (5) against the workpiece until there is no gap between the nail/staple head (5) and the workpiece.
   2) Only push the safety switch (1) to the marked “on” place.
   3) Briefly press the trigger (2) and then release again.

   **NOTE**: Remove all nails (10) / staples (9) from the magazine after each use.
**Maintenance**

**WARNING:** Remove the plug from the mains power socket before carrying out any adjustment, servicing or maintenance.

There are no user serviceable parts in your power tool. Never use water or chemical cleaners to clean your power tool. Wipe clean with a dry cloth. Always store your power tool in a dry place. Keep all working controls free of dust. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

**Warranty**

Your new FERREX® 45W Staple / Nail Gun will more than satisfy your expectations. It has been manufactured under stringent FERREX® Quality Standards to meet superior performance criteria.

You will find your new FERREX® 45W Staple / Nail Gun easy and safe to operate, and, with proper care, it will give you many years of dependable service.

CAUTION. Carefully read through this entire instruction manual before using your new FERREX® 45W Staple / Nail Gun.

Take special care to heed the Cautions and Warnings.

Your FERREX® 45W Staple / Nail Gun has many features that will make your job faster and easier. Safety, performance, and dependability have been given top priority in the development of this 45W Staple / Nail Gun, making it easy to maintain and operate.

Use only FERREX® replacement parts for your product. Non-conforming parts or modifications made to parts will void your warranty.

**Environmental protection**

Recycle unwanted materials instead of disposing of them as waste. All tools, hoses and packaging should be sorted, taken to the local recycling centre and disposed of in an environmentally safe way. Dispose of used engine oil in a manner that is compatible with the environment.
We suggest you take it in a sealed container to your local service station for reclamation. Do not throw it in the trash or pour it into the earth.

**What your 3 year warranty means**
Great care has gone into the manufacture of this product and it should therefore provide you with years of good service when used properly.

In the event of product failure within its intended use over the course of the first 3 years after the date of purchase, we will remedy the problem as quickly as possible once it has been brought to our attention. In the unlikely event of such an occurrence, or if you require any information about the product please contact us via our after sales support services, details of which can be found in this manual and on the product itself.
