QR codes take you where you want to go quickly and easily

Whether you require product information, spare parts or accessories, details on warranties or aftersales service, or if you want to watch a product demonstration video, our QR codes will take you there in no time at all.

What is a QR code?
A QR-code (QR=Quick Response) is a type of matrix that can be read with a smartphone camera and that contains a link to a website or contact details, for example. Advantage: You are not required to manually enter a website address or contact details.

How it works
To scan the QR code, all you need is a smartphone with QR codes reader software and an Internet connection*. This type of software can be downloaded for free from your smartphone’s app store.

Try it out now
Just scan the QR code with your smartphone and find out more about the Aldi product you have purchased*.

* Depending on your tariff you may be charged for the connection.

Application
Congratulations in choosing to buy a Workzone® 13W Engraver. All products bought to you by Workzone® are manufactured to the highest standards of performance and safety and, as part of our philosophy of customer service and satisfaction, are backed by our comprehensive 3 Year Warranty. We hope you will enjoy your purchase for many years to come.

When you open your packaging, first remove all items and check there are no parts damaged or missing. If you find anything wrong, do not operate the product until the parts have been replaced or the fault has been rectified. Failure to do so could result in serious personal injury.

NOTE: First time users or inexperienced operators pay particular attention to the operation of the 13W Engraver, including details of starting and stopping and correct use of the 13W Engraver on pages 11, as well as the maintenance instructions on pages 12.

Intended use of the 13W Engraver

NOTE: This product is for private domestic DIY use only. It is not suitable for commercial or trade use.

This 13W Engraver is used for engraving or decorating a wide variety of materials like, metal, plastic, glass, ceramic, wood and leather.

The tool is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse.
Contents of carton

1 x 13W Engraver
1 x Tungsten carbide tip
2 x Stencils
1 x Instruction manual
1 x Warranty Card & Certificate
Description of symbols

The instruction manual, rating plate, or on the product itself, may show these symbols. These represent important information about the product or instructions on its use.

To reduce the risk of injury, user must read instruction manual

Wear ear protection
Wear eye protection
Wear breathing protection

Conforms to relevant standards for electrical safety and electromagnetic compatibility.

Double insulation

36 Months Warranty
General safety warnings

PRODUCT SAFETY
General Power Tool Safety Warnings

⚠️ WARNING Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1) Work area safety
   a) Keep work area clean and well lit. Cluttered or dark areas invite accidents.
   b) Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   c) Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2) Electrical safety
   a) Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
   b) Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
   c) Do not expose power tools to rain or wet conditions. Water
entering a power tool will increase the risk of electric shock.

d) Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.

e) When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.

f) If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

3) Personal safety
a) Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

b) Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.

c) Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d) Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

e) Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

f) Dress properly. Do not wear loose clothing or jewellery. Keep your hair and clothing away from moving parts. Loose clothes,
jewellery or long hair can be caught in moving parts.

g) If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust-related hazards.

h) Do not let familiarity gained from frequent use of tools allow you to become complacent and ignore tool safety principles. A careless action can cause severe injury within a fraction of a second.

4) Power tool use and care

a) Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.

b) Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c) Disconnect the plug from the power source and/or remove the battery pack, if detachable, from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.

d) Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.

e) Maintain power tools and accessories. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool’s operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.

f) Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) Use the power tool, accessories and tool bits etc. in
accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

h) Keep handles and grasping surfaces dry, clean and free from oil and grease. Slippery handles and grasping surfaces do not allow for safe handling and control of the tool in unexpected situations.

5) Service
a) Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

Electric engraver safety warning
1. Recommendation that the tool always be supplied via a residual current device with a rated residual current of 30 mA or less.
1. Engraving tip
2. Stroke adjustment dial
3. On/off switch
4. Power cord
5. Stencil x 2
6. 1.5mm Hex key
7. Tip release screw
Installation an engraver tip (see fig. A1, A2)

WARNING! Disconnect the engraver from the power supply, turn the on/off switch (3) to the OFF position, before making any adjustments or undertaking maintenance procedures.

1) Loosen the tip release screw (7) by turning it anti-clockwise with the hex key (6) supplied.
2) To fit the new engraving tip (1), insert the tip through the centre of the hole of the engraver, ensuring the tip fully enters the housing. A new tip should protrude from the end of the housing by approximately 8.5mm.
3) Tighten the tip release screw (7) fully by rotating in a clockwise direction.
Operation

**WARNING!**
- Always wear safety glasses when using this tool.
- After 30 minutes continuous working, the tool needs to be stopped to cool down to room temperature before use again.

**Using the engraver (see fig. B)**
1) Before using the engraver you must ensure there is an engraving tip (1) installed.
2) Connect the engraver power cord (4) to the power supply and hold the engraver firmly.
3) To turn the engraver on, press the on/off switch (3) to the “I” position. To turn the engraver off, push the on/off switch (3) to the “O” position.
4) Hold the machine in a vertical position (almost 90° to the workpiece). Try to execute individual lines in one uniform movement without stopping if possible as later on it will be possible to make out paused and uneven movements on the engraved workpiece. Sketch out the outlines on the workpiece prior to engraving if necessary (e.g. with the aid of the stencils provided. It may also assist to clamp down the stencil onto the work piece to sketch the outlines) in order to make it possible to engrave more even lines.

**NOTE:** Do not press down hard while engraving, use light pressure while guiding the point over the work to be completed.
Adjusting the depth of engraving (see fig. C)
The stroke adjustment dial (2) located on the side of the engraver controls the stroke length and therefore the depth of engraving.
1) For a fine mark, turn the stroke adjustment dial (2) anti-clockwise to position ‘1’.
2) For a deeper, thicker mark, turn the stroke adjustment dial (2) clockwise to position ‘5’.
NOTE: It is recommended that you practice on scrap material before you start.
Maintenance

**WARNING!** Always ensure that the Engraver is switched off and the plug is removed from the power point before making any adjustments or undertaking maintenance procedures.

1) Use a soft brush to remove any accumulated dust. Wear safety glasses to protect your eyes whilst cleaning.

2) If the body of the engraver needs cleaning, wipe it with a soft damp cloth. A mild detergent can be used but never alcohol, petrol or other harsh cleaning agents.

3) Never use caustic agents to clean plastic parts. Keep the motor ventilation slots clean.

**Caution: Water must never come into contact with the engraver.**

**General inspection**
Regularly check that all the fixing screws are tight. They may vibrate loose over time.

**Power cord maintenance**
If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

**Storage**
Store in a secure, dry place out of the reach of children. Do not place other objects on the product.
Warranty

Your new WORKZONE® 13W Engraver will more than satisfy your expectations. It has been manufactured under stringent WORKZONE® Quality Standards to meet superior performance criteria. You will find your new 13W Engraver easy and safe to operate, and, with proper care, it will give you many years of dependable service.

CAUTION. Carefully read through this entire instruction manual before using your new WORKZONE® 13W Engraver. Take special care to heed the Cautions and Warnings. Your WORKZONE® 13W Engraver has many features that will make your job faster and easier. Safety, performance, and dependability have been given top priority in the development of this 13W Engraver, making it easy to maintain and operate. Use only WORKZONE® replacement parts for your product. Non-conforming parts or modifications made to parts will void your warranty.

Environmental protection

Recycle unwanted materials instead of disposing of them as waste. All tools, hoses and packaging should be sorted, taken to the local recycling centre and disposed of in an environmentally safe way.
What your 3 year warranty means

Great care has gone into the manufacture of this product and it should therefore provide you with years of good service when used properly. In the event of product failure within its intended use over the course of as quickly as possible once it has been brought to our attention. In the unlikely event of such an occurrence, or if you require any information about the product please contact us via our after sales support services, details of which can be found in this manual and on the product itself.
