

BOAT TYPE 1X

Jeff Sykes founded his company on a unique and innovative scull design and quickly established a name for design innovation and product quality.

Since 1966, Sykes has seen a continuous process of refinement and development which is ongoing. Sykes now offers four different moulds in our single scull fleet.

BOAT TYPE 1X

Mould	Length (m)
135	7.35
137	7.53
138	7.69
139	8.30

Rower Weight in KG									
55	60	65	70	75	80	85	90	95	100+
		135							
			137						
				138					
							139		

A Single Scull for Everyone.

Sykes' new range of single sculls are available in four unique shapes to suit rowers in all size ranges, including a new weight range not catered for before (80-90kg). The new generation of singles feature a new shape and layup that has been years in the making. Not only do the new designs feature low drag, they are also more stable than any other racing scull that Sykes has produced previously. All Sykes performance racing boats are made at our Breakwater, Australia factory using only the highest quality materials that are sourced from all over the world.

Sykes' single sculls are available with stern mounted alloy rigger or bow mounted carbon fibre rigger options. Like all of Sykes' fittings, the new bow mounted carbon rigger is easy to adjust, thanks to a unique c-cup design.

Sykes Single Sculls start at \$12,416 incl GST
