

# BOAT TYPE

# 4+

Designs that have set course records in Lucerne, won World Championships and produced Australia's first ever Olympic medal in women's rowing, yet versatile enough to be the number one choice for most of Australia's School rowing programs. That's the heritage that backs your choice in a full range of coxed fours and quadruple sculls. So dominant that it's not uncommon to see every medalist in National School events racing in a Sykes boat.

We have a range of coxed boats to suit every weight category in the sport. The versatility of our designs for club and school programs is the secret to our success.

## BOAT TYPE 4+

Mould	Length (m)
410	12.80
456	11.66
457	11.71
408	13.10
407	13.40

Rower Weight in KG									
55	60	65	70	75	80	85	90	95	100+
			410						
			456						
					457				
					408				
								407	

Construction	Benefits
Honeycomb <b>Carbon</b> Sandwich Laminate	Maximum Performance
Honeycomb <b>Kevlar</b> Sandwich Laminate	Performance with Resilience
Honeycomb <b>Glass</b> Sandwich Laminate	Advantage of Sandwich Laminate with cost savings
Fibreglass/Spheretex/Carbon Reinforced	Durability / High Impact

Mould	Recent Successes	Competition
