

Mex-Magic™

New Advanced Very High Foam Encapsulation Detergent

HMIS Hazard Rating		
Health	1	0=Minimal
Flammability	0	1=Slight
Reactivity	0	2=Moderate
PPE		3=Serious
		4=Severe

Primarily designed for use with a Cimex machine and other low moisture rotary type machines that utilize on board spray or gravity fed systems.

Description

Mex-Magic contains a unique blend of plant-based & other GREEN surfactants coupled with a brittle drying copolymer. It is very safe and environmentally friendly with over 99.6% readily biodegradable ingredients at use dilution. Mex-Magic does not contain any petroleum distillates, butyl, enzymes, phosphates, etc. Side-by-side tests with competitive non-green products will convince you of its power as a high foam encapsulation product.

Applications

May be used on all colorfast carpet & upholstery.

Commercial	Residential	Upholstery	Pad or Bonnet Pre-spray
X	X	X	X

Dilution Chart		
Application	Product	Water
Average Soiling	2 to 4 oz	1 gal
Heavy Soiling	4 to 8 oz	1 gal
Super Spotter	8 to 16 oz	1 gal
Anti-Wicking Agent	32 oz	1 gal

Directions

Test for color fastness before applying any cleaning product to carpet or upholstery. Mix product according to directions using the dilution ratios listed above and on the label.

Pre-vacuum or pile lift carpet to remove dry particulate soil. Can be applied with any normal method of applying pre-spray such as a pump-up sprayer or a gravity fed system such as used with a Cimex & some rotary machines. Depending on application method and degree of soiling, apply at 200 - 400 SF per gallon.

For best results, agitate the solution into the carpet pile with a high agitation machine such as a Cimex, Oscillating Pad, Rotary Bonnet, or Counter-Rotating Brush type machine.

Soil Removal Methods:

- * **Encapsulation only method:** Remove encapsulated soil, by vacuuming thoroughly when carpet is dry or have your client vacuum at the next scheduled vacuuming interval.
- * **Combination method... Also called PadCapping or BonnetCapping:** To remove the majority of the soil, simply clean as usual using a bonnet or oscillating pad machine. When the carpet has dried it can then be vacuumed to remove any remaining encapsulated soil.

See product label and SDS for additional information and instructions.

NOTE: Not sold or authorized by Cimex. Neither The Cleaner Image or VacAway is associated in any way with Cimex.

Benefits

- ▶ Provides an excellent visual foam indication of how much cleaning solution is being applied.
- ▶ Non-Toxic — Carcinogen-Free.
- ▶ >99.6% Readily biodegradable.
- ▶ Safe and very economical.
- ▶ Pleasant Scent.
- ▶ Encapsulates Soil.
- ▶ Far superior to competitive products.

Other Info

pH..... Approx 8.0 at 4oz per gallon
 Stability..... Freeze-Thaw Stable
 Packaging..... 1 gal bottles (4 per case)
