## Description

**How does Odor Death remove odor?** First of all, it DOES NOT work by masking or covering up odor. It DOES NOT use troublesome, slow acting enzymes. It uses the oxidizing power of Stabilized CLO<sub>2</sub> technology.

**What kind of odor does Odor Death remove?** This amazing product removes obnoxious odors such as those caused by pet urine, skunk spray, vomit, mold & mildew, feces, organic & protein decay. It is very effective on odors associated with death such as cadaverine (dead mouse). It works to remove odors caused by urine, smoke, putrefaction, doggie odor, etc., etc., etc.

**Besides removing odor what other qualities does Odor Death have?** It can be added to most cleaning presprays to create a dual purpose application. It will not leave a sticky dirt attracting residue. It dries completely non-sticky.

## Application/Directions

Odor Death is designed for use as a stand-alone product, but if preferred, it can be added to most any detergent/prespray (See Dilution Chart for mixing rate).

Dilution Chart		
Application	Product	Water
Light to Medium Odor	12 oz	1 gal
Heavy Odor	12 - 24 oz	1 gal

- Pre-test all items to be cleaned for color fastness before applying.
- Remove any visible odor source and pre-vacuum carpet.
- Locate contaminated areas using a black light or moisture detector. Treat the areas with a pump-up or injection sprayer until saturated. An in-line pressure sprayer (10:1 tip) may be used without diluting the product. Agitate with a pile brush or rake.
- Depending on saturation of substrate and degree of odor, apply to carpeting at approx 100 - 300 SF per gallon of RTU product and give 15-20 minutes dwell time. *(Remember, to remove odor, the solution MUST come in contact with the odor source, so in severe situations complete saturation of the carpet, including the padding, may be necessary).* Clean and extract with your method of choice such as hot water extraction or a low moisture system such as pads or bonnets *(This product WILL NOT leave a dirt attracting residue).*
- For subsurface applications on carpet a water-claw like tool can be used to extract from the carpet backing and padding underneath.
- May be used on all surfaces that are both color-fast and water-safe. Use to kill odors on upholstery, mattresses, hard surfaces, pet bedding, litter boxes, etc.
- For hard surfaces, spray or wipe Odor Death and let set for several seconds; remove with a clean damp cloth or towel.

## Benefits

- Complete removal of most odors.
- ZERO sticky or dirt-attracting residue.
- Environmentally friendly.
- Wool and Stain resist safe.
- Virtually indefinite shelf life both diluted and undiluted.
- People safe....Pet safe... (non-carcinogenic).
- Your choice: Unscented or Lemon.

## Other Info

- + Packaging.... Gallons (4 per case)
- + pH approx 8.5 (1 to 10 dilution)
- + Freeze-Thaw stable
