Description

Oxi-Moxie is a super aggressive, crystallizing, encapsulating spot/stain remover that effectively removes most organic spots/stains. After cleaning the stained area to remove excess contamination, it should be applied using a trigger sprayer. Its stain removal qualities is provided by the hydrogen peroxide it contains. It not only removes stubborn spots and stains, but it also prevents them from coming back with its excellent anti-resoiling agent.

In short, it is a perfect combination of low pH, aggressive surfactant technology, encapsulating polymers and stain removing hydrogen peroxide.

Applications

Oxi-Moxie is a fantastic product for removing such stains as coffee, urine, juice, soda spills, vomit, blood and other organic spots/stains. For best results when using this product, cover the area with plastic after application. The covered area will dry much slower allowing the stain removing oxygen to release slowly.

Directions

- ⇒ Clean stained area to remove excess contamination.
- ⇒ Saturate by liberally applying Oxi-Moxie with a trigger sprayer. Agitate and blot clean. Lightly reapply and walk away!
- ⇒ **NOTE:** Covering the area with plastic will improve performance (Works best in the final stage of drying as it releases its stain removing oxygen.)

See product label and SDS for additional information and instructions.

Benefits

- ☆ Very Cost Effective!
- ☆ Prevents re-appearing spots/stains.
- ☆ Crystallizes upon drying with ZERO sticky or dirt-attracting residue.
- ☆ One-step stain removal.
- ☆ Penetrates and emulsifies the sticky film that binds dirt to carpet fibers.
- ☆ No unplesant scent.
- ☆ Contains "Stain removing Hydrogen Peroxide".
- ☆ Freeze-Thaw stable.
- ☆ Low pH (5.0 - 6.0)

Packaging.....1 Quart bottles (12 per case)
