

INTRODUCING THE NEW **ORBOT™** Vibe

MOP/BUCKET

SQUARE MACHINE

CYLINDRICAL BRUSH

POLISHER

BOX EXTRACTOR

TRUCK MOUNT

One Machine, Any Floor, World-Class Results

BENEFITS

- Certified by the Carpet and Rug Institute (CRI) as a Deep Cleaning System
- Combines deep, interim and maintenance cleaning methods
- Carpets dry within minutes
- No recurring stains
- Restore grout to like new condition
- Chemical free stone and hard floor care
- Proven Orbot reliability
- Effortless maneuverability
- Made in the USA 
- ...and more

APPLICATIONS

- Carpet
- Tile and Grout
- VCT/ Linoleum
- Stone
- Wood
- ...and more

MARKETS

- Building Services / Contractors
- Hospitality
- Healthcare
- Education
- Retail
- ...and more

EXPERIENCE THE NEW METHOD

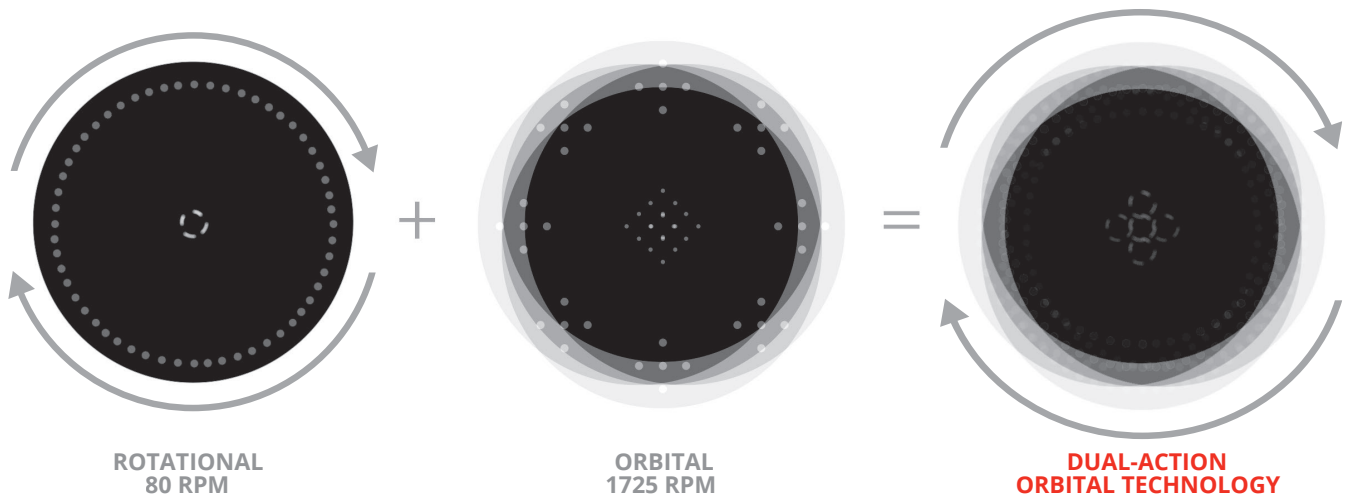

ORBOT™

ORBITAL TECHNOLOGY

THE SECRET BEHIND THE UNIQUE CLEANING EFFECT OF THE ORBOT

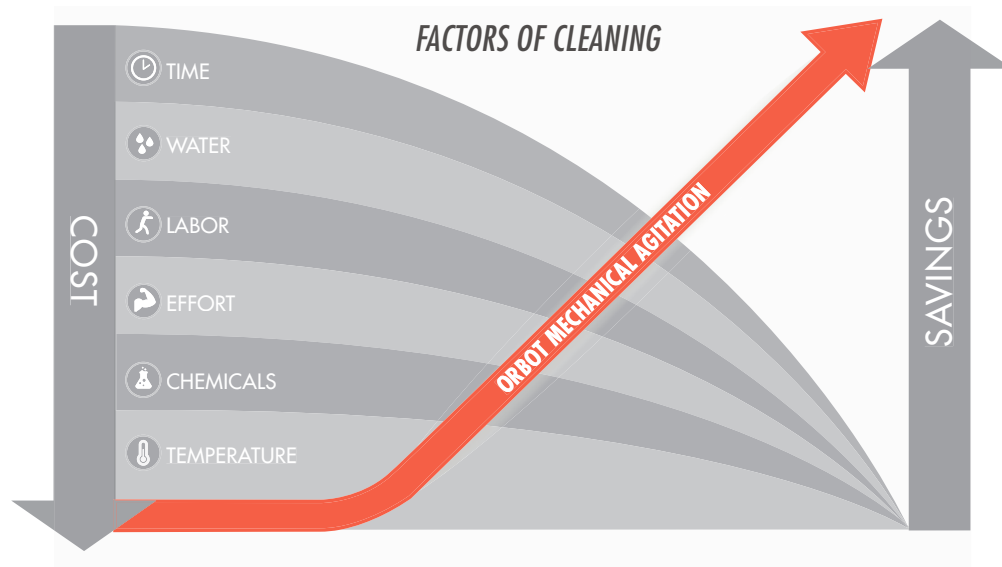

MECHANICS

- The meticulous engineering of each Orbot machine incorporates our patented drive system that combines two mechanical motions in one — orbital and rotational.
- This unique design provides a powerful form of vibration that generates an increased level of agitation, which is the principal factor for delivering superior results in all professional cleaning, scrubbing, grinding, stripping, and polishing applications.

INCREASED EFFICIENCY

- The Orbot generates thousands of small $\frac{3}{8}$ " orbits that spin at 1725 oscillations per minute, while also rotating 360 degrees around the motor shaft at 80 rpm. This dual action makes cleaning faster, easier and safer than with traditional cleaning equipment.
- By increasing the mechanical cleaning power with Orbot machines, other factors like water, time, chemicals, physical effort and temperature are reduced — and in some cases — eliminated.
- This high-performance system enables the diverse applicability of Orbot machines on multiple floor types and significantly makes it stand out from the competition.

EXPERIENCE THE NEW METHOD

ORBOT™

CARPET

TRADITIONAL METHODS VS. THE NEW METHOD

TRADITIONAL METHODS

Standard carpet cleaning methods create problems such as:

- Substandard results
- Wet carpets
- Long dry times
- recurring stains
- Mold and Bacteria growth
- Damages carpet fibers
- Poor indoor air quality
- Carpet wrinkles
- Color fading
- Slip and Fall accidents
- Reduced carpet life
- Voided carpet warranties

THE NEW METHOD

The Orbot method eliminates all of the problems created by traditional methods by utilizing our patented vibration extraction technology. This innovative method provides the safest, fastest, and most efficient type of deep cleaning available. The Orbot method is certified by the Carpet & Rug Institute (CRI) and recommended by carpet manufacturers worldwide.

ACCESSORIES

SUPERZORB PAD

Highly absorbent cotton-polyester blend pads are specifically designed for the Orbot. Thoroughly remove moisture, soil, and lift carpet pile allowing faster dry times. #HOSSZP21

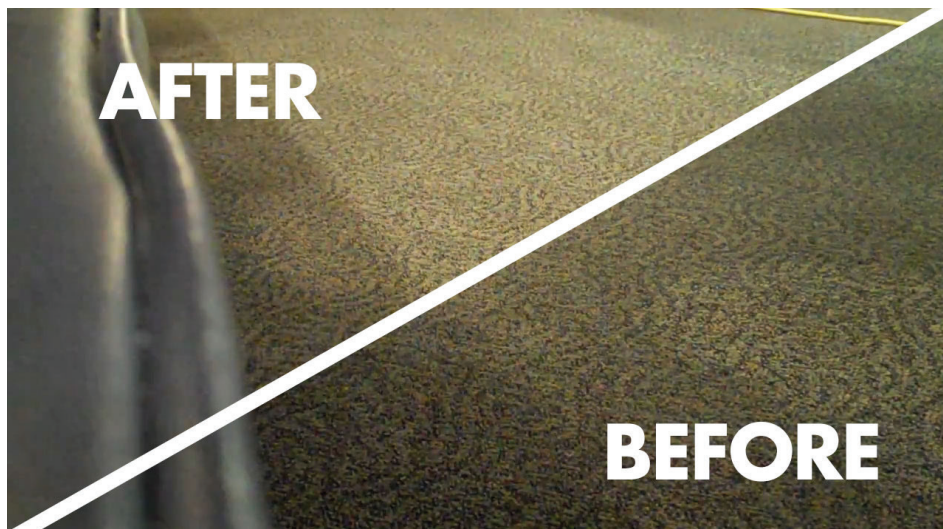

AGICLEAN PAD

This pad is used to pre-agitate carpet fibers, They are superior in liberating hard to remove soil from residential and commercial carpets. #HOSACP19

ENVIRON HP

Our exclusive eco-friendly "encapsulation" water-based cleaning solution contains a unique polymer. Dirt particles in carpets are entrapped and can be easily extracted through post-vacuuming. #HOSEHP4G

EXPERIENCE THE NEW METHOD

ORBOT™

TILE & GROUT

TRADITIONAL METHODS VS. THE NEW METHOD

TRADITIONAL METHODS

The most common machines used to clean tile and grout are rotary, cylindrical, and pressure washer machines. However, these traditional systems can create problems such as:

- Multiple passes required to penetrate grout lines
- Labor intensive
- Brush bristles do not reach deep grout lines
- Grout lines along edges of walls cannot be reached
- Harsh chemicals required to achieve results
- Crevices, cracks, and pores are difficult to clean

THE NEW METHOD

The New Method by Orbot achieves unparalleled cleaning results on tile and grout by combining our machine's patented technology with our multi-surface brush. The secret behind our multi-surface brush system is its unique design which contains bristles of varying lengths and diameters. The short, thicker bristles clean top surfaces, while the medium length bristles reach into stubborn crevices and pores. The longer, angled bristles located around the outer edge of the brush are specifically developed to clean hard to reach areas such as along edges and around obstacles. This system reduces the need for excessive water and harsh chemicals.

SHORT, THICKER BRISTLES
CLEAN TOP SURFACES

MEDIUM LENGTH BRISTLES REACH
INTO STUBBORN CREVICES & PORES

LONGER, ANGLED BRISTLES CLEAN
ALONG EDGES & AROUND OBSTACLES

ACCESSORIES

MULTIPURPOSE SCRUB BRUSH

Developed to complement our orbital mechanics, it's thin nylon bristles reach into small pores and crevices while the longer, angled outer bristles allow for cleaning along edges and obstacles.

#HOSOTGB

40 LB WEIGHT KIT

Designed for use on all hard floor applications. Allows the operator to choose the right amount of weight needed to clean, scrub, strip, polish, sand, hone, and maintain any hard floor type.

#HOSO40WK

ULTRALIFT PAD

Designed to create a suction effect to lift soil and grease from micro-porous flooring such as tile, stone, wood, vinyl and more. Use these pads to help restore flooring to its original color and texture.

EXPERIENCE THE NEW METHOD

ORBOT™

STONE

TRADITIONAL METHODS VS. THE NEW METHOD

TRADITIONAL METHODS

Traditional methods used to grind and polish stone flooring requires labor intensive procedures and chemicals to create a shiny floor appearance. These traditional systems create common problems such as:

- Consistency
- Long lasting shine
- Orange peel effect
- wavy reflections
- Labor intensive
- Extensive professional training
- Messy cleanups
- Calcium deficient stone
- Etching damage

THE NEW METHOD

The StoneFlash Pad system was created to allow any operator to achieve superior results without the use of chemicals, polishing compounds, and steel wool pads. This user friendly system allows unskilled operators the ability to grind, hone, and polish like a true professional. Achieve consistent color, depth and factory finish results on marble, limestone, travertine, epoxy and/or cement terrazzo, concrete, and granite.

ACCESSORIES

COMPLETE RESTORATION KIT

Revive those worn-out looking floors with the StoneFlash Complete Restoration Kit. Includes Steps 1 through 6.

#HOSSFPS-17

ULTRALIFT PAD

Designed to create a suction effect to lift soil and grease from micro-porous flooring such as tile, stone, wood, vinyl and more. Use these pads to help restore flooring to its original color and texture.

#HOSMP17U

40 LB WEIGHT KIT

Designed for use on all hard floor applications. Allows the operator to choose the right amount of weight needed to clean, scrub, strip, polish, sand, hone, and maintain any hard floor type.

#HOSO40WK

MAINTENANCE PAD

Maintenance pad for achieving a high-gloss polish or for daily maintenance

#HOSSFMP-17

EXPERIENCE THE NEW METHOD

ORBOT™

WOOD & VCT

TRADITIONAL METHODS VS. THE NEW METHOD

TRADITIONAL METHODS

Traditional methods used to strip floor coatings require labor intensive procedures that cause problems such as:

- Toxic indoor air quality
- Slip and fall situations
- Labor intensive process
- Use of masks, boots, and safety equipment
- Need for Vacuum and ventilation systems
- Damaging floor surfaces

THE NEW METHOD

The Orbot method is simple to use as a result to our innovative orbital free floating head technology, low moisture spray system, and specially designed AkwaStrip and Lift pads. This new method provides a chemical and hazard free solution to floor care.

ACCESSORIES

AWKWASTRIP PAD

The revolutionary AkwaStrip pad can strip wax off of wood, VCT and vinyl floors without using any harsh chemicals, just water.

#HOSASP17

SUPERZORB PAD

Highly absorbent cotton-polyester blend pads are specifically designed for the Orbot. Thoroughly clean and dry in one pass without damaging coatings.

#HOSSZP21

40 LB WEIGHT KIT

Designed for use on all hard floor applications. It allows the operator to choose the right amount of weight needed to clean, scrub, strip, polish, sand, hone, and maintain any hard floor type.

#HOSO40WK

ULTRALIFT PAD

Designed to create a suction effect to lift soil and grease from micro-porous flooring such as tile, stone, wood, vinyl and more. Use these pads to help restore flooring to its original color and texture.

EXPERIENCE THE NEW METHOD

ORBOT™

CONCRETE

TRADITIONAL METHODS VS. THE NEW METHOD

TRADITIONAL METHODS

Concrete flooring unfortunately is a porous substrate that easily traps soil and grease making it difficult to maintain. Standard methods for restoring and cleaning various types of concrete flooring tend to have problems addressing:

- Cleaning without excessive chemicals and water
- Mold growth
- Greasy and slippery floors
- Mineral deposits

THE NEW METHOD

The Orbot method provides an environmentally preferred form of removing soil and grease with minimal water and chemical use. When combining the Orbot's patented orbital mechanical action with our concrete brushes and Lift pads, hard to reach pores, cracks, and crevices are easily cleaned and maintained.

ACCESSORIES

MULTIPURPOSE SCRUB BRUSH

Developed to complement our orbital mechanics, it's thin nylon bristles reach into small pores and crevices while the longer, angled outer bristles allow for cleaning along edges and obstacles.

#HOSOTGB

CONCRETE BRUSH

Our concrete brush is designed for outside concrete and other rough surfaces. Great for cleaning walkways with minimal water.

#HOSOCB

40 LB WEIGHT KIT

Designed for use on all hard floor applications. Allows the operator to choose the right amount of weight needed to clean, scrub, strip, polish, sand, hone, and maintain any hard floor type.

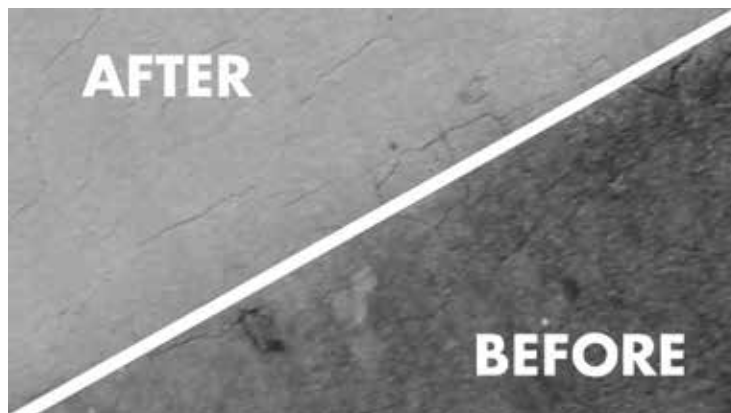

#HOSO40WK

ULTRALIFT PAD

Designed to create a suction effect to lift soil and grease from micro-porous flooring such as tile, stone, concrete, vinyl and more. Use these pads to help restore flooring to its original color and texture.
