

Bag-in-Box Filling System Instructions

Video - <https://youtu.be/IFsDVUCC6AY>

Thank you for purchasing the Bag-in-Box Filling System. If you have any questions please contact us at mail@farmhousecider.ca .

STEP #1 - Remove tap and place bag/ pouch in the stand so the stand sits between the bag and the first ring on the spout.

STEP #2 - Fill the bag/pouch to just below the spout using a siphon hose or funnel.

STEP #3 - With one hand push out the remaining air in the bag and then place the tap in the spout to the first click..

Face the spout to the short side of the bag. Once seated the spout may still be rotated.

STEP #4 - Grab the stand at the neck and push the tap down with your palm until seated (2 more clicks).

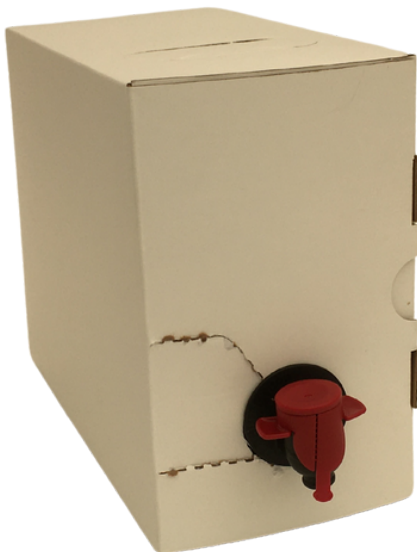

Optional STEP #4 - How To Re-use The Bag/Tap

After the first click at **STEP #3**, only push the tap down 1 more click instead of 2 in **STEP #4**. This will still make a great seal and allow you to remove/re-use the tap and bag. If you seat the tap (2 clicks) it will not come out. Please do not forget to clean/sanitize the tap and bag prior to re-using.

STEP #5 - Place the bag in the box with the tap at the top and on the same side as the U shape on the flap. Fold in the side flaps 1st, next the U shaped flap and then the last flap.

Serving Position - Put box in pouring position, remove safety seal and enjoy!

Storage Tip - Once the bags are filled they do not need to be stored in the box. The bags may be stored separately, even stacked, then put in a box for serving. This will allow you to reuse a box several times. Bags should be stored out of direct sunlight and in a cool room is possible.
