Charging Time: 3h

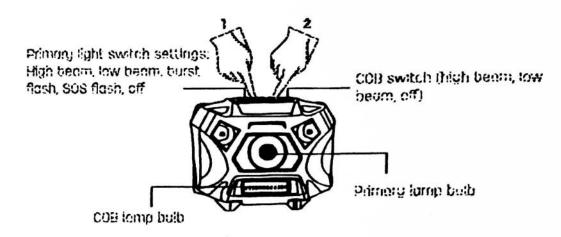

Charging Input: 5V XIA MAX. Runtime: 4h (high beam)

Product Moterials: ABS + Polyester

Working Temperature Range: -20 C-50 C

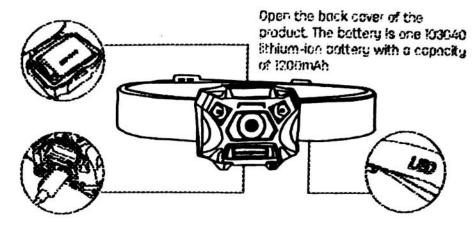

Protection Level: IPX2

Brightness settings

Long-press the switch for about 3 seconds to switch to Motion Sensor mode, and the primary light will respond to your hand motions. You can control the light by waving your hand at the distance of 5-10CM from the lamp to the left and right or up and down (note: this feature only functions on fully lit settings).

2 Long-press the switch for about 3 seconds to switch to Motion Sensor mode, and the COB light will respond to your hand motions. You can control the light by waving your hand at the distance of 5-10CM from the lamp to the left and right or up and down (note: this feature only functions on fully lit settings) (Red COB Type).

Unplug the waterproof charging stapper, plug in a USB cable in the direction of the hole to charge. The indicator light is red while charging and will turn green when the charge is complete.

The size of the headband can be adjusted as needed allowing you to work more comfortable.

CAUTION

- 1 To avoid battery damage, do not use the product during charging.
 - 2 Keep the appliance away from flammable or explosive materials during charging.
 - 3 When using the light, do not shine it directly into eyes to prevent damage to vision (children should only use the product under adult supervision)
- 4 Do not attempt to disassemble the appliance on your own if it has been damaged, please call our service team or a professional for repair.
- 5 Do not disassemble, strike, or squeeze the battery, and do not throw it into fire.
- 6 Stop using the product if the bottery is severely swollen.
- 7 Do not place the battery in high-temperature locations.
- 8 Do not use the bottery if it has been soaked in woter.
