2. Product Schematic

Front view

Side view (with door open)

Panel layout

- 1 Box
- 2 Panel
- 3 Handle

- 4 Reset key
- 5 LED lamp
- 6 Backside cover
- 7 Internal battery compartment

- 8 Slide cover
- 9 Main lock key hole
- 10 Display screen
- 11 Keys
- 12 Emergency key hole
- 13 External power supply socket

3. First Use

1. Push the slide cover to the left to the limited position;
2. Insert one of the main lock keys and one of the emergency keys into the corresponding key holes on the panel, respectively, first turn the emergency key clockwise, then turn the main lock key and handle clockwise to open the door.

(Turn the main lock key clockwise to open the door for the products without a handle)

4. Battery Installation (alkaline battery is required)

1. Put the four 5# batteries into the internal battery compartment located on the backside of the door according to the correct polarity. A "beep" will sound after the power is supplied;
2. Enter the factory password "12345678";
3. Press the key "#" to confirm, and the display shows "OPEN". Please turn the main lock key and handle clockwise within 6 seconds to open the door.

5. Password Setting

The factory password of this product is "12345678".Please reset your personal password before use to ensure safety.

- 1) Enter the factory password "12345678"and confirm it by pressing the key "#", and the display shows "OPEN" ;
 - 2) After "OPEN" goes out on the display (please set a new password within 25 seconds), press the Reset key on the backside cover of the door and the display shows "set" ;
 3. Enter a 1-8 digit password;
 4. Press the key "#" to confirm. The display shows "into 1", and the new password is set.
- Tip: Verify the new password after the password is set, and then lock the door after confirmation.

6. Door Closing Operation

1. Closing the door;
2. (a) For the products with a handle: turn the handle counterclockwise, then turn the main lock key counterclockwise and pull it out.
(b) For the products without a handle: turn the main lock key counterclockwise and pull it out.

7. Keyless Opening

1. Push the slide cover to the left to the limited position, and insert one of the main lock keys into the main lock key hole;
2. Turn the main lock key 90° clockwise and pull it out to turn on the keyless door opening mode;
3. After this mode is turned on, only enter the correct password to pass the verification or use the emergency key, and turn the handle to open the door;
Remark: In order to turn off this mode, only when the door is open, insert the main lock key into the main lock hole, turn it 90° counterclockwise and pull it out.

Keyless opening mode

Keyless closing mode

8. Hidden Code Function

1. In the standby state, the display only shows "--" instead of digits when pressing the key "#" and entering the password.
2. The digit display is automatically restored after the door is opened.

9. Deleting Incorrect Password

If an incorrect password is entered during the operation, it can be deleted by using the key "*" before pressing the key "#" to confirm. The password of entire line will be deleted by pressing the key "*" once. Please enter the correct password again at this time to open the door.

10. Alarm Function

■ Wrong password alarm

1. The display shows "Error" each time an incorrect password is entered;
2. It will alarm for 50 seconds if the wrong password is entered consecutively for three times;
3. Entering the correct password during the alarm can stop the alarm.

■ Vibration alarm

1. Press the key "*" in the standby state, the display shows "ALERT ON", and the vibration alarm mode is turned on at this time. The vibration alarm is automatically turned off after the door is opened normally;
2. Entering the correct password during the alarm can stop the alarm, and automatically turn off the vibration alarm function at the same time.

11. Battery Replacement

When the voltage of the batteries drops to a certain level, the display will show "Lo bat" after the password is entered each time, indicating that the battery voltage is insufficient, please replace with new batteries as soon as possible. (It is recommended that you use 5# alkaline batteries).

12. Emergency Opening

1. Please provide power by using the external battery compartment when the batteries are depleted and the operation cannot be made. Insert the plug of the external battery compartment into the external power supply socket located on the side of the panel, and enter the correct password to open the door.
2. Please use the emergency key to open the door when the electronic system fails or the password is forgotten. The way to open the door is the same as the first use.

13. Precautions for Use

1. Do not put the user's manual, main lock keys, emergency keys and external battery compartment in the box, they should be stored in other safe place;
2. The batteries should be taken out to prevent the leakage of liquid from damaging the electronic system if the product is left unused for a long time ;
3. Always fix the cabinet to a solid concrete wall for safety ;
4. Do not store too much cash and valuables when unattended or without a remote alarm device.

Installation layout
