ENGLISH

physical, sensory or mental capabilities or lack of experience and knowledge, as long as they have been given supervision or instruction concerning the use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance.

- Supervise young children to make sure that they do not play with the appliance. Close supervision is necessary when the appliance is being used by or near children.
- This product is a Group 2 Class B ISM equipment. The definition of Group 2 which contains all ISM (Industrial, Scientific and Medical) equipment in which radio-frequency energy is intentionally generated and/or used in the form of electromagnetic radiation for the treatment of material, and spark erosion equipment. Class B equipment is suitable for domestic use and in establishments directly connected to a low voltage power supply network, which supplies buildings used for domestic purpose.

WARNING: Technical service and reparations that involve cover removals or exposure to cables must always be carried out by a competent, professional and qualified person.

WARNING: It is important to use materials and containers which are suitable and safe for microwave cooking. The table below shows which materials are suitable and which are not:

Material of container	Microwave	Grill	Combi	Notes
Heat-resistant ceramic	Yes	Yes	Yes	Never use ceramics which are decorated with metal rim or glazed.
Heat-resistant plastic	Yes	No	No	Cannot be used for long time microwave cooking.
Heat-resistant glass	Yes	Yes	Yes	
Plastic film	Yes	No	No	It should not be used when cooking meat, high temperature might damage the film.
Grill rack	No	Yes	Yes	
Metal container	No	No	No	Microwave cannot cook through metal.
Lacquer	No	No	No	Poor heat-resistance. Cannot be used for high-temperature cooking.
Bamboo wood and paper	No	No	No	Poor heat-resistance. Cannot be used for high-temperature cooking.

3. BEFORE USE

1. Take the product out of its package. If the microwave has a protective film, tear it off before starting operation. Check carefully if there is any damage, and if there is, immediately notify the Technical Support Service.
2. The product must be placed on a flat, stable and dry place and kept away from corrosive materials, heat and humidity, such as gas burners or water.
3. To ensure enough ventilation, minimum distances have to be kept:
 - From the back part to the wall: 10 cm.
 - From the side to the wall: 5 cm.
 - Free distance from the top surface: 20 cm.
 - From the microwave to the ground: 85 cm.
4. The product must be placed, at least, at 5 m from the TV, Radio or antenna.
5. The product must be placed in such way that the plug is accessible, and must ensure an effective grounding in case of leakage in order to avoid electric shocks.
6. The microwave door must be closed in order to operate.
7. In case there is any manufacturing rests in the microwave cavity or on the heating elements, leave the microwave open to ensure good ventilation. In such case, it is recommended to heat a glass of water at high power for several times.

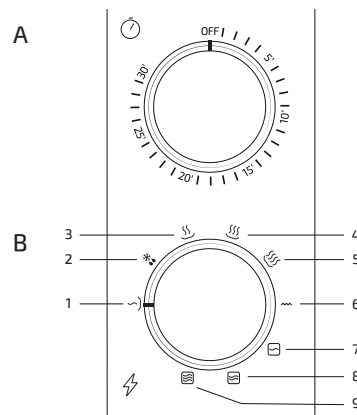

WARNING: Never remove the mica plate!

4. CONTROL PANEL

1. Low power
2. Defrost
3. Medium power
4. Medium-high power
5. High power
6. Grill
7. Combi 1
8. Combi 2
9. Combi 3

A. TIMER

- The maximum cooking time that can be set is 30 minutes.
- Each setting is 1 minute.
- A bell will ring when the cooking process finishes and the timer will go back to Zero position.

ENGLISH

B. FUNCTION KNOB

There are 5 power levels:

 High	100% power output	Quick cooking
 M. High	81% power output	Normal cooking
 Med	58% power output	Slow cooking
 Defrost	36% power output	Defrost
 Low	18% power output	Keep warm

The following table shows different food's approximate defrosting time:

FOOD KIND	WEIGHT RANGE	DEFROSTING TIME
Meat	0.1~1.0kg	1:30~26:00
Poultry	0.2~1.0kg	2:30~22:00
Seafood	0.1~0.9kg	1:30~14:00

FUNCTIONS

- Grill : during this function, only heating elements operate. Perfect for broiling sausages, chicken wings, meat, sandwiches etc.
- Combination: magnetron and heating elements operate in an alternate way. According to food properties, select mode in order to obtain the best result. 3 combination options:
 - Combi 1 : operating time: 30% magnetron, 70% heating elements.
 - Combi 2 : operating time: 49% magnetron, 51% heating elements.
 - Combi 3 : operating time: 67% magnetron, 33% heating elements.

5. OPERATION

1. Connect the product to the power supply. Before connecting it, make sure the timer is set on Zero position.
2. Do not block the microwave ventilation screen.
3. Place the food on the glass tray and close the door. Food must be placed on a container, never directly on the glass tray.
4. Select power level.
5. Program timer. If the cooking time is less than 10 minutes, turn the timer knob passed 10 minutes and then take it back to the desired number of minutes.

6. Once the timer is programmed the microwave will start operating. If pausing is needed during operation, open the door at any time. Once the door is closed again, the product will start operating again.
7. When the timer times out and the cooking is finished, a bell will ring and the inside light will automatically turn off. If food is removed from the microwave before the bell rings, make sure you put the timer back to Zero position in order to avoid it from operating empty.

6. COOKING TIPS

1. Food arrangement: place the thickest food parts towards the edge of the glass tray. If possible, do not overlap food.
2. Watch cooking time: cook for the shortest amount of time at first, and add more minutes in case it is necessary. Over-cooking may result in smoke and burns.
3. Cover food while cooking: covering the food you are going to cook avoids spattering and allows a more even cooking.
4. Flip or stir food once during the cooking process.
5. Respect pre-heating time. Pre-heating time specified on the food's label must not be exceeded.

7. CLEANING

CAUTION: The product, as well as food rests, must be cleaned and removed regularly.

1. Remove the power cord from the wall socket before cleaning. Do not immerse the product in water or any other fluid during cleaning.
2. Failure to maintain the product in clean conditions could lead to surface deterioration and could adversely affect the product's shelf life, resulting in possible hazard.
3. Never use strong detergents, gasoline, abrasive powder or metal brush to clean any part of the product.
4. Do not remove the mica plate.
5. When the microwave has been used for a long time, some strong odours may arise from inside. In order to get rid of them, follow one of the steps below:
 - Place several lemon slices in a cup and heat them at high power for 2 or 3 minutes.
 - Place a cup of red tea inside the microwaves and heat it at high power for 2 or 3 minutes.
 - Place orange peels inside the microwaves and heat it at high power for 1 minute.
6. Use a dampened soft cloth to clean enclosures, door, interior walls and the glass tray.

ENGLISH

8. TECHNICAL SPECIFICATIONS

Model: ProClean 3110

Product reference: 01523

Microwave Power: 700 W

Grill Power: 800 W

Voltage and frequency: 230 V, 50 Hz

Capacity: 20 L

Made in China | Designed in Spain

9. DISPOSAL OF OLD ELECTRICAL APPLIANCES

The European directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE), specifies that old household electrical appliances must not be disposed of with the normal unsorted municipal waste. Old appliances must be collected separately, in order to optimize the recovery and recycling of the materials they contain, and reduce the impact on human health and the environment.

The crossed out "wheeled bin" symbol on the product reminds you of your obligation to dispose of the appliance correctly. If the product has a built-in battery or uses batteries, they should be removed from the appliance and disposed of appropriately.

Consumers must contact their local authorities or retailer for information concerning the correct disposal of old appliances and/or their batteries.

10. TECHNICAL SUPPORT SERVICE AND WARRANTY

This product is under warranty for 2 years from the date of purchase, as long as the proof of purchase is submitted, the product is in perfect physical condition, and it has been given proper use, as explained in this instruction manual.

The warranty will not cover the following situations:

- The product has been used for purposes other than those intended for it, misused, beaten, exposed to moisture, immersed in liquid or corrosive substances, as well as any other fault attributable to the customer.
- The product has been disassembled, modified, or repaired by persons, not authorised by the official Technical Support Service of Cecotec.
- Faults deriving from the normal wear and tear of its parts, due to use.

The warranty service covers every manufacturing defects of your appliance for 2 years, based on current legislation, except consumable parts. In the event of misuse, the warranty will not apply. If at any moment you detect any problem with your product or have any doubt, do not hesitate to contact Cecotec Technical Support Service at **+34 96 321 07 28**.
