## Aoka

# USER MANUAL PROJECTOR

Please read this user's guide carefully before operating the projector and save this guide for future use.

## **Precautions for Use**

Follow these safety instructions and read these helpful tips before setting up and using the projector.

## **Important Safety Instructions**

Do not disassemble the projector. If needed, please contact your dealer for repair/replacement.

Do not use the different power source, it may result in fire or electric shock. Please use the indicated type of power source.

Do not look into the lens when the projector is operating. The bright light may damage your eyes.

Do not use the projector near water or sources of heat.

Place the projector on an even surface or stable stand. If the projector is mounted on a ceiling, it should be installed by qualified mounting hardware which designed for use with this projector.

Unplug the projector after powering down.

In order to maintain the performance and reliability of the projector, please leave at least 30CM between the projector and the wall.

## **Helpful Tips**

For incredible clarity and optimum results, operating the projector in a dark environment is recommended.

You may adjust the focus ring simultaneously until to get crystal clear images.

Please understand that the projector makes noise for heat dissipation during working. Nevertheless, it will not affect watching experiences when connected to an audio device.

Projector is ideal for home entertainment, such as videos watching, photos viewing and games playing etc. Please be advised that the projector is not for business data presentation.

If there is no sound when playing videos, you may check whether these videos are equipped with Dolby technologies. The projector cannot support Dolby Vision for the present, but you can connect projector to a computer/laptop for videos watching instead.
