USER MANUAL PROJECTOR

VS6002

Please read this user's guide carefully before operating the projector and save this guide for future use.

Precautions for Use

Follow these safety instructions and read these helpful tips before setting up and using the projector.

Important Safety Instructions

	Do not disassemble the projector. If needed, please contact your dealer for repair/replacement.
	Do not use the different power source, it may result in fire or electric shock. Please use the indicated type of power source.
	Do not look into the lens when the projector is operating. The bright light may damage your eyes.
	Do not use the projector near water or sources of heat.
	Place the projector on an even surface or stable stand. If the projector is mounted on a ceiling, it should be installed by qualified mounting hardware which designed for use with this projector.
	Unplug the projector after powering down.
	In order to maintain the performance and reliability of the projector, please leave at least 30CM between the projector and the wall.

Helpful Tips

For incredible clarity and optimum results, operating the projector in a dark environment is recommended.

You can slide the focus wheel left and right until you get a clear image.

Please understand that the projector makes noise for heat dissipation during working. Nevertheless, it will not affect watching experiences when connected to an audio device.

Projector is ideal for home entertainment, such as videos watching, photos viewing and games playing etc. Please be advised that the projector is not for business data presentation.

Projector Cleaning and Maintenance

	For optimum watching experiences and longer lifetime, please clean the projector periodically.
	For projector maintenance, please seek help from or under the guidance of specified persons.
	If it is necessary to replace any parts of the projector, please feel free to contact the dealer or qualified customer service team.
	Before cleaning and maintaining the projector, please turn off the projector and unplug the power cord.

Projector Cleaning

Always keep the projector clean to avoid affecting images quality and ventilation system during working caused by dust, dirt and smudge.

Cleaning the Vents

Use a soft brush or a special designed small vacuum to remove the dust.

- Note: For cleaning process, do Not spray any liquid (included water) directly on any parts of the projector. Do Not use the chemical liquid to clean the projector which will damage the projector.

Batteries Replacement of the Remote Co

		
1. Open battery cover of the remote control;	2. Insert batteries with the + and – ends as the indicators on the battery box showed;	3. Close battery cover of the remote control properly.

Projector Maintenance

For this part, we only offer the basic maintaining suggestions. If you have any further requirements (replacement or repair), please contact the dealer or qualified customer service team.

Technical Specifications
