A WAY OF LIFE FOR OVER 34 YEARS

We are one of the few larger companies that still maintain the title of family owned and operated. We have not been sold, bought, acquired, merged, adjusted, outsourced, etc. Everyone that is part of Morrell Targets lives in the same county. Seven family members have worked for Morrell and 5 members still do. Our key employees have been with us from the beginning. We believe in our products because it reflects who we are.

We believe a smaller business can bring unparalleled customer service and unbeatable quality products to our dealers. We believe America was founded on small companies like ours and we want to keep this way of life going for generations to come.
# TABLE OF CONTENTS

#huntingstartshere
Our targets from start to finish are made from American muscle. There is no other way to achieve a target with such high quality standards to withstand all compound bows and crossbows of your average hunter. Machine automation is unique to building targets but very ineffective. It lessens the quality of durability. This is a big reason we do not automate. Our Employees work hard and we are proud of each and every one of them. We believe in our people and they have yet to fail in building superior archery targets.
Completely Fused Layers™
Stops 350 feet per second
Weather resistant
Stops field points and broadheads

MORRELLTARGETS.COM | 1-800-582-7438
WHAT IS ARCHERS USA?

Archers USA is an archery training system designed educate beginning archers. The system was created so that all new archers young or old will be successful immediately and not walk away frustrated after flinging arrows all over the target using more difficult shooting styles. The Archers USA ISC system works amazingly well for retailers who rent equipment as well as for clubs and programs that provide equipment during training. The Archers system can help solve problems faced by the R3 archery community who are working on recruitment, retention, and reactivation. It will help stimulate the recovery of the archery industry by making learning to shoot easy fast and successful.

INDIVIDUAL SHOOTING CODE
ARCHERY SHOOTING SYSTEM BY ARCHERS USA

1 DIGIT 1 RELEASE AID

Release Aid Body
The release aid has an adjustable design that will adjust from 1 to 5: 1 for small hands and 5 for larger hands.

2 DIGIT 2 RELEASE AID

Release Aid Strap
The Release Aid Strap has holes ranging from 1 to 10. They are used to tighten the release on the archer’s wrist. The strap is inserted into the buckle and is positioned to the hole which allows the release to be held comfortably on the archer’s wrist.

3 DIGIT 3 PEEP SIGHT

Four Hole Peep Sight
The peep sight has four peep holes: Diamond, Oval, Triangle, Square. The Diamond peep hole #1 is used for archers with a 19-21 inch draw length. The Oval peep hole #2 is used for archers with a 21-24 inch draw length. The Triangle peep hole #3 is used for archers with a 24-27 inch draw length. The Square peep hole #4 is used for archers with a 27-30 inch draw length.

4 DIGIT 4 POUNDAGE GAUGE

Poundage Gauge
The limb pockets option or weight varies and determines the draw percentage for each archer when tightened all the way down. That will give you the first digit which is 6. For every pound increase the code digit will reduce by one.

5 DIGIT 5 I.S.C. SIGHT

Elevation Adjustment
The elevation adjustment has numbers ranging from 1 to 46 on the elevation portion of the sight. The elevation may be adjusted up or down. The elevation will change if distance from target changes.

6 DIGIT 6 I.S.C. SIGHT

Windage Adjustment
The Windage Adjustment may be adjusted to the right or to the left and ranging from 1 to 35.
