Ring Indoor Camera (2nd Generation)

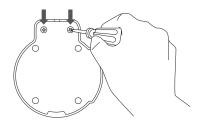

#### Precaution

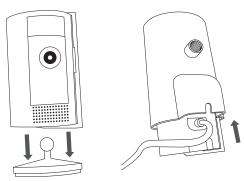

- Read this manual carefully, misuse could lead to injury or damage to your camera and property.
- Make sure to follow the installation instructions to ensure proper sealing and to prevent water from getting into the case.

#### Installation

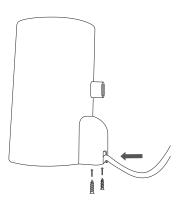

1. Unscrew the case using the screwdriver provided.

Use some force to pull the stand base from the camera, then insert the camera into the case with the power cable connected.

3. Close and secure the screws at the bottom of the case. Make sure the cable sits in the groove at the back.

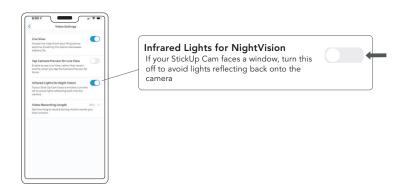

4. If you install the camera outdoors, mount the wall mount with the screws and anchor provided. Ensure to route the cable lower than the case to prevent water from getting into the case.

3

5. In the Ring camera app, turn off the "infrared light" in the settings to avoid light reflecting from the case's window.

6. The camera is good to go.

# General Specifications:
