

Important Note

- 1. Before connecting to your camera, fully charge the solar panel by leaving it in direct sunlight for 8-10 hours!
- 2. Ensure that your Wyze Cam Outdoor is fully charged before you connect it to the solar panel.

Box Content:

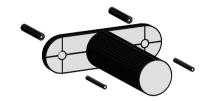

- $\cdot \quad \text{Solar Panel Compatible with Wyze Cam Outdoor}$
- · 360-degree Mounting Bracket
- Weatherproof Micro USB Charging Cable
- Installation Screws & Wall Anchors

Where should I install the Solar Panel?

You can mount the solar panel up to 13.1 ft/4 m (max cable length) away from your Wyze Cam Outdoor. Install your solar panel at a location where it will receive a few hours of direct sunlight daily. The solar panel can be mounted onto walls or roofs. If you do not wish to drill holes we recommend you to buy our Solar Panel Gutter Mount from Amazon (B07KHXD58X).

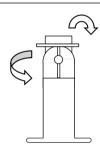

How do I mount the Solar Panel?

You can mount your device directly onto wood using the included screws. If you are mounting onto brick, concrete, or stucco, mark the holes first using the bracket, drill a hole for the anchors. You can then insert the anchors and subsequently use the screws to secure the mount.

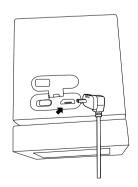

How do I adjust the Solar Panel?

The 360-degrees rotatable mounting bracket allows you to adjust the Solar Panel in the best position to absorb sunlight.

How do I connect the Solar Panel to the Wyze Cam Outdoor?

Attach the Wasserstein Solar Panel to your Wyze Cam Outdoor with the specially constructed outdoor micro USB charging cable. The charging cable is designed to provide a continuous charge to your camera even on days with minimal direct sunlight. In order to plug this charger in the camera, open the rubber cap located at the back of your camera, and plug in the cable's connector. Press firmly after you have plugged in the cable to make sure it is sealed well.

General Specification

Dimension : 7.5 in x 6.0 in x 1.25in

Power : 2W 5VOutdoor Cable Length : 13.1 ft

Warning

- 1. Please do not try to open or break the solar panel.
- 2. Please keep the solar panel away from any heat source and fire.
- 3. Please make sure that the outdoor charging cable is properly attached to the camera.
- 4. Please avoid stretching the outdoor charging cable to its fullest extent. Use a cable extender to help you relocate your solar panel to a better sunlight position.
