

HOW TO USE THIS GUIDE

1. Print out both pages of this fitment guide using paper format A4. Make sure paper scaling is set to "none" in your print settings to insure proper measurements.
2. Check the centimeters/inches guide lines with a ruler to confirm 100% scale accuracy.
3. Cut the bottom of page 1 and fold bottom of page 2.
4. Use tape or glue to adhere page 1 onto page 2.
5. Place constructed fitment guide on floor with the heel edge against the wall.
6. Place longest foot on top of fitment guide with your heel against a perfectly straight wall, and your longest toe on the center axis.
7. Look down at the fitment tool to see what your size is : your size is the parallel line above your longest toe mark.
If you find yourself between 2 sizes, pick the biggest one for a relaxed use and the smallest one for a more active use.

SIZE CONVERSION CHART

CM	23	23,7	24,4	25	25,7	26,4	27	27,7	28,4	29
