

# How to Overcoat VC® 17m

Recommended Antifouling Products from Interlux®

## Overcoating Recommendations

1. Thoroughly clean the hull with a high-pressure freshwater wash to prior to wet sanding
2. Wet sand the existing VC 17m with 120 grit sandpaper
3. Remove sanding residue and any other surface contamination from the surface by wiping down with Special Thinner 216, using the two-cloth method
4. Apply the first of two coats of Micron CSC - CA, Bottomkote - CA, or VC Offshore

### Micron® CSC – CA

Multi-season antifouling paint based on Controlled Solubility Copolymer technology. This product is designed to polish at a controlled rate providing multi-season protection with reduced paint buildup allowing for an easier reapplication and improved performance.

For more information on Micron CSC - CA scan the QR code below

### Bottomkote® – CA

Bottomkote – CA provides excellent season-to-season protection, enabling the antifouling paint to wear away with use and eliminates the build-up of old spent coatings and the heavy sanding needed to remove them.

For more information on Bottomkote - CA scan the QR code below

### VC® Offshore

VC Offshore is a hard antifouling ideal for high performance power boats and racing sail boats. Formulated to provide a smooth and low-friction surface which can be burnished or wet-sanded to achieve a smoother surface with maximum durability.
