MENT: PRIVATE SWIMMING POOL

EASYCLIC®

Floating distributor with stabilized chlorine

BENEFITS

FLOAT DOSER FOR POOLS
MULTI-FUNCTIONAL EFFECTS:
LONG-TERM DISINFECTION
ANTI-ALGAE EFFECT
Clarifying effect

SPECIFICATION

• Algicide effect • The chlorine is stabilized against the destructive effects of UV rays from sunlight • Does not contain copper sulfate • Self-floating dosing device, very easy to use • The chemical products are completely soluble • Very high active ingredient content • Long-term disinfection • Not classified as oxidizing for Storage and handling • Suitable for any water, even for very hard • Clarifying effects

DIRECTIONS FOR USE

1 -Adjust the pH between 7.0 and 7.4. Then do this at least once a week

2 -Pull the plastic shrink-wrapped label vertically and lower it onto the dotted tape at the point marked with a pink arrow to tear the label and adjust the floating meter to the pool volume. Keep the label for future reference.

3 - This is how the floating feeder is optimally adjusted:

Find one of the two vertical white arrows symmetrically located at the base of the swimmer. Turn with a firm jerk to make a hole to distribute the product in the pool water. Choosing the right opening size for the pool volume:

Size XXS (smallest holes) for a swimming pool from 5 to 15 m³

Size XS (medium-sized holes) for a swimming pool from 15 to 25 m³

Size S (largest holes) for a swimming pool from 25 to 30 m³

4 - After setting and when nobody is in the pool, place the floating doser directly in the pool. The float tips on its side when it is empty; continue treatment with a new floating doser.

It can be a swimming pool with more than 30 m³ be treated; use two swimmers and adjust their opening size to the appropriate volume, which makes up half of the total pool volume. Never put the float in the skimmer.

* The treatment time for this product is given as a guide, based on a water with standard characteristics; it can fluctuate by more or less than 2 weeks if the pH, TAC or temperature values are very different from the normal values.

COMPOSITION

• Contains symclose (> 850 g / kg)

PRECAUTIONS

• Never put the floating doser in a skimmer. Take the dosing device out of the pool before bathing and store it in a clean bucket filled with 10 liters of water outside, away from the bathers. After bathing, put the floating doser and the contents of the bucket back into the basin. • Store the product in a dry and well-ventilated room, at a maximum average temperature of no more than 35 ° C.
