

DISINFECT

FIELD OF APPLICATION: SPA

STABILIZED CHLORINE granulated

06/17/2013

PRODUCT BENEFITS

QUICK DISSOLUTION SANITIZER

CHARACTERISTICS

• Disinfectant action • High stabilization against the destructive action of the ultraviolet rays of sunlight • Usable in hard water (high TH) • Compatible with all filtration equipment • Non-oxidising during transport, storage and handling • Rapidly dissolving granules, without residue • Average content of gaseous chlorine equivalent close to 56%

MANUAL

Make sure the filtration is on. Adjust the pH between 7.0 and 7.4

Distribute the product in the spa, as close as possible to the surface, in front of the delivery nozzles if there are any (take into account the direction of the wind to avoid getting the product in the eyes) or slowly introduce the product into the skimmer . Check the chlorine content before allowing swimming.

Allow 15 grams per m3 of water.

COMPOSITION

• Sodium dichloroisocyanurate dihydrate (1000 g / kg)

PRECAUTIONS FOR USE

Never pour water on this product. In contact with too low volumes of water, this product can react violently (heat, toxic gases, projections, etc.). • If the chlorine content of the pool water exceeds 4 mg / l, do not bathe. •

If a scoop is provided, use it only for this product and return it to dry in the bucket. • Never pour roduct on the surface of the water in the presence of swimmers. • Store in a dry place, in a well-ventilated place, at an average daily temperature not exceeding 35 ° C • DO NOT MIX WITH ANY OTHER PRODUCT (BUCKET, KIMMER, FLOATING DIFFUSER). NEVER DISSOLVE BEFORE USE.

care

Acute Tox. 4 - Eye Irrit. 2 - STOT SE 3
