

Regular disinfection

FIELD OF APPLICATION: RESIDENTIAL POOL

ACTION 5® MINITAB
20g Stabilized chlorine

PRODUCT BENEFITS

01/23/2013

SPECIAL FOR SWIMMING POOLS LESS THAN 20
M3 COMPLETE TREATMENT IN ONE STEP:

1. DISINFECTANT - 2. ANTI-ALGAE - 3. CLARIFIER - 4. FLOCCULANT - 5. CHLORINE STABILIZER

CHARACTERISTICS

Disinfectant action • Algacide action • High stabilization against the destructive action of ultraviolet rays of sunlight • Usable in hard water (high TH) • Compatible with all filtration equipment • Slow dissolving 0 gram tablet, no residue • Non-oxidising during transport, storage and handling • flocculant ction • Average chlorine gas equivalent content of around 86%

MANUAL

• Make sure the filtration is on. Adjust the pH between 7.0 and 7.4
The shelves are designed to be placed in a skimmer or in a floating diffuser, provided this is suitable.

In outdoor swimming pools, maintain a stabilizer concentration of between 25 and 50 mg / l. Provide 1 tablet for 2 m3 of water, every 7 to 10 days.

• Not recommended as a permanent water treatment for vinyl coated swimming pools (liners, etc.)

COMPOSITION

contains Symclosene (> 940 g / kg) and copper sulfate (10 g / kg)

PRECAUTIONS FOR USE

Warning

Harmful if swallowed. • Causes serious eye irritation. • May irritate the respiratory tract. • Very toxic to aquatic life with long lasting effects.

• Never pour water on this product. On contact with too low volumes of water, this product can react violently (heat, toxic gases, projections, etc.). • If the chlorine content of the pool water exceeds 4 mg / l, do not bathe. • Never put any product or floating diffuser on the surface of the water in the presence of swimmers. Never place a floating diffuser in a skimmer. Before swimming, fill a clean bucket with 10 liters of water, remove the diffuser from the pool and place it in the bucket of water. Keep the set in a safe place, outdoors, away from bathers. After swimming, replace the diffuser in the basin and then pour the contents of the bucket into it as well. • Placed in direct contact, this product can discolor a vinyl coating (liner, etc.). • Before using this product, you must read all instructions and safety instructions. • Contamination or improper use of this product may cause fire, explosion or release of toxic gases • This product must never be in contact or mixed with any other treatment product anywhere (bucket, dispenser, floating diffuser, skimmer, container, etc.) • Keep in a dry place, in a well-ventilated place, at an average daily temperature not exceeding 35 ° C • DO NOT MIX WITH ANY OTHER PRODUCT. NEVER DISSOLVE BEFORE USE.
