

Keurig B150

The B150 is Keurig's newest single-cup machine that brews using individual K-Cups. Designed for mid-sized offices, its most exciting feature is a full-color touch screen used to select brew size (4-12 ounces) and start the brew cycle. The B150 can be plumbed-in, or used as a pour-over brewer with a 90-ounce reservoir. It has a removable cup tray to accommodate larger mugs.

Keurig's single-cup machines brew using patented K-Cup technology. Instead of brewing an entire pot, each user selects their desired K-Cup, places the sealed, self-contained cup into the machine, and lets the brewer do the rest. Keurig machines brew exactly one cup of hot, fresh, delicious coffee at a time -- eliminating waste and clean-up.

Dimensions	10.5"W, 13.8"H, 14"D, 18 lbs
Cups Per Brew	1 Cup
Initial Brew Quality	Excellent
Minutes of Freshness	Fresh cup on demand
Recommended Population	5-20 People
Non-Coffee Beverages	Cocoa, Teas
Variety of Selections	Dozens
Time to Brew	40-45 Seconds
Plumbed-In or Pour-Over?	Either
Caters to Individual Taste	★★★★☆
Ease of Brewing	★★★★☆
Ease of Cleaning	★★★★★
