Oils

- **Almond Oil**- Light, non-greasy, fast absorbing and conditions the hair. Almond oil is reportedly good for treating skin conditions such as eczema and seborheic dermatitis
- **Amla Oil** - Reportedly slows down shedding and hair breakage.
- **Apricot Kernel** - Lighter than olive oil, but with similar moisturizing properties. Excellent oil for sealing hair.
- **Argan oil** is rich in fatty acids Omega's 3 and 9. It is non greasy and lightweight while effectively penetrating the hair shaft. It locks in moisture into the hair, shields against harmful UV rays and environmental pollution while keeping the hair smooth and shiny.
- **Avocado Oil**- Promotes healthy cell growth, maintains shine, helps prevent hair loss by helping increase the blood flow to the hair follicles and scalp. Avocado oil penetrates the hair, smooths the hair cuticles and helps protect from future damage.
- **Babassu Oil**-
- **Broccoli Seed Oil**- A light non-greasy oil that adds shine and luster to hair.
- **Camelina Oil**- Rich in essential fatty acids that protect hair follicles from damage.
- **Castor Oil**- Improve scalp circulation, moisturizes, seals cuticles to prevent breakage and split ends. Castor oil also nourishes the hair, prevents the scalp from drying while helping maintain the moisture.
- **Coconut Oil** -
