

Below are conversion tables from UK shoe sizes into the other international sizes. All Ray Rose dancing shoes are sold in UK sizes.

Please note that Japanese Shoe Sizes are actually measured in centimetres from the inner back of the heel to the furthest part of the inner sole.

If you are a competitor of medium to high standard we suggest to get half a size smaller, if you are a entry level competitor or medallist then we would suggest the correct size and if you are a social or beginner dancer then possibly half a size up.
