---

### 1999 - 2015 Nissan Xterra Behind 2nd Row Seats Rear Barrier Divider Net Installation

**NOTE:** Many newer models have B-pillar handles and even overhead on the ceiling that can be used for some of the top mounting locations. Check to see if you prefer to use these factory locations as the nets typically have enough adjustment to allow for this option. If your vehicle does not have handles in desired locations or you prefer to install mounting points for better fitment, please follow the below steps.

**IMPORTANT: READ INSTRUCTIONS FULLY BEFORE STARTING**

***Time:*** About 30 minutes

***Tools:*** (may vary by vehicle)

None needed

## Step 1

Use your factory ceiling hooks for the top straps.

## Step 2

Fold rear seat forward. Use the rear seat catch bolts for the middle straps.

## Step 3

With rear seat still folded forward, slide bottom straps under the seat hinges. Slide from center of floor to the wheel well under that bracket and the strap will pop up when it pushes on the plastic wheel well housing.

## Step 4

Cinch tops first tight, then lower and finally draw the center section until the net is the flattest. Check the seat uprights that they do not pinch the middle straps and then finish up the ends.

NETS & GRIPS

## Step 5

Do a final adjusting and check your seat positioning. Seat can be in forward or upright position without being affected by the net.

## Step 6

Wrap and tuck your straps for a nice, clean look.

See video here for details on tying up loose ends: <https://vimeo.com/316588617>

Thank you for purchasing Raingler Nets.
