2008– Newer Toyota Sequoia Behind 2nd Row Rear Seats Barrier Divider Net Installation

NOTE: Many newer models have B-pillar handles and even overhead on the ceiling that can be used for some of the top mounting locations. Check to see if you prefer to use these factory locations as the nets typically have enough adjustment to allow for this option. If your vehicle does not have handles in desired locations or you prefer to install mounting points for better fitment, please follow the below steps.

IMPORTANT: READ INSTRUCTIONS FULLY BEFORE STARTING

Time: approximately 60 minutes

Paw Level:

Tools:

1. Ratchet or Wrench
2. 10MM socket/wrench
3. 14MM socket/wrench
4. Small flat blade and/or panel removal tool for removing access covers and releasing plastic snap divots.

Step 1

Attach top points to overhead handles.

Step 2

Remove the 10mm bolt in the side panel.

Install the square black rings included with your net and reinstall the bolt.

Repeat on other side.

Step 3

Remove the bolt at the bottom of the rear seatbelt and install the bent black hardware piece. Repeat on other side.

Step 4

Now it's time to install your net. Loosely hang the net from the top mount points first, then attach the bottom straps to the bottom mounts. Tension to pull down and locate net where you like it checking the 2nd row seats reclining desired position as well. Lastly draw out the middle to flatten the center of the net how you prefer.

Step 5

Tie up the loose ends. You can do this by feeding the end of the strap through the opening of the buckle to create a loop. Feed the strap through the loop, and the strap behind, continue until no strap is hanging.
