Overhead Ceiling Storage Net Install

Jeep Wrangler

NOTE: Many newer models have B-pillar handles and even overhead on the ceiling that can be used for some of the top mounting locations. Check to see if you prefer to use these factory locations as the nets typically have enough adjustment to allow for this option. If your vehicle does not have handles in desired locations or you prefer to install mounting points for better fitment, please follow the below steps.

IMPORTANT: READ INSTRUCTIONS FULLY BEFORE STARTING

Time: *About 30 minutes*

Paw Level:
Tools: *none*

Step 1

Inspect product before installing. Great care was made to ensure you get a blemish free, extremely high-quality product. Report any damages immediately to shipping carrier and then us for instruction.

Step 2

Remove top if possible. It will make the installation extremely difficult to do if the vehicle top is in place. Soft tops can be lowered down to the back.

Step 3

Start at the front of the vehicle over the front seats. The net can be draped over the top of the Jeep with the Raingler logo facing up at the rear of the vehicle. Install the two center front straps through the footman mount on the windshield as shown below; leaving all straps loose until final centering and adjustment is made.

(NOTE: pics taken from underneath with top in place for illustration purposes)

Step 4

Work along sides above seats and towards rear of vehicle, lay net over top of sound bar and install buckles in same manner as front ones. This part comes by easily if you have a helper doing the other side of the Jeep at the same time to ensure even spacing and centering of net.

Step 5

Center and then tighten up netting as tight as desired. Wrap the excess strap back into the buckle slot and then around itself and finally under itself and pull taut.

Step 6

If you have one of our divider nets, the rear straps of the overhead net are designed to interlock with the divider netting as shown here.

Step 7

The use of the Raingler net is only limited by your needs and creativity. The stainless-steel rings make a great place to hook carabineers clips and other items to.
