## NETS & GRIPS

---

### MCN Net Install

### Jeep Wrangler

NOTE: Many newer models have B-pillar handles and even overhead on the ceiling that can be used for some of the top mounting locations. Check to see if you prefer to use these factory locations as the nets typically have enough adjustment to allow for this option. If your vehicle does not have handles in desired locations or you prefer to install mounting points for better fitment, please follow the below steps.

**IMPORTANT: READ INSTRUCTIONS FULLY BEFORE STARTING**

***Time:*** About 60-90 minutes

***Paw Level:***

***Tools:*** none (may vary by vehicle)

### Step 1

Inspect product before installing. Great care was made to ensure you get a blemish free, extremely high-quality product. Report any damages immediately to shipping carrier and then us for instruction. Before installing, check clearances at each step for hidden obstruction.

### Step 2

Open back window, fold down back seat(s). Lay out the net with the Raingler label facing up driver's side. Repeat each the following steps for both sides of the vehicle as you go.

### Step 3

Locate the channel behind the door catch under the carpet edge. With the seat belts in front of the net; feed the net's strap down through the channel and back to the buckle. A small slit in the carpet will make for a clean install here.

#### Step 4

From the back of the vehicle; install the footman mounts on the wheel well, just inside of the body wall. Placement is not critical as the net has plenty of adjustment.

#### Step 5

Install lower corner straps to factory floor mounted cargo points.

#### Step 6

Now install the second to back row of buckles around the roll bar and under the seat belt retractor boxes.

#### Step 7

Line up location for third from back row buckles and install the second pair of footman mounts on the inside of the body tub rail.

#### Step 8

install the front corner lower mounts to the factory floor cargo mounts and then either leave the remaining two straps on for load securing (can install additional footman mounts if desired) or simply cut off and remove them.

#### Step 9

The use of the Raingler net is only limited by your needs and creativity. The stainless-steel rings make a great place to hook carabineers clips and other items to.
