

AIRTURN® QUICK START GUIDE

Product Overview

A

Power Button / Virtual Keyboard

Press and hold to power your pedal ON or OFF.
Quick press to show/hide virtual keyboard.

B

Power Indicator (displays when powered ON)

Full: unlit

Drained: quick flash (three times)

Low: slow flash (once per 3 seconds)

Charging: steady flash (once per second)

Charged: solid

C

Bluetooth Indicator

Seeking: rapid flash (twice per second)

Connected: steady flash (once per 3 seconds)

Sending: solid (when switch is pressed)

D

Mode Button

Your pedal is set to Mode 2 by default.

Hold the button to switch between modes. Release when the number of flashes equals the desired mode. Reference mode chart in user manual.

E

Foot Switches

The switches control the app functions. Different actions can be assigned with the AirTurn Manager app.

F

Power Port

USB Charging requires a 5v/2A USB charging block and the included charging cable. May also use a center negative, 9v power supply (not included).

Setup Instructions

Step 1:

Press and hold the Power Button to turn ON the AirTurn device.

Step 2:

Turn ON your host device's Bluetooth. Once the AirTurn device appears in the list, select it to pair.

Step 3:

Launch your compatible app from your device, and start enjoying your freedom to perform!

Step 4:

Download the free AirTurn Manager app for a full range of customization features.
