DYE SAFETY TIPS

UE dyes are safe to use when handled with care. Because these concentrated powders can easily become airborne, we recommend the following safety precautions:

Keep unmixed dye packets away from pets and small children.

Use an N95 mask to protect your lungs, and gloves to protect your skin.

Do not prepare powdered dyes near food or drink. Pysanka dyes are not edible. Do not use on eggs that will be eaten.

Mix dyes in a sink or over a surface covered with damp newspaper. The damp paper will absorb any airborne dyes that would otherwise land on your work surface.

CITRIC ACID CRYSTALS

PYSANKA DYE ADDITIVE 20g

Citric acid is used as a substitute for vinegar, or to increase the acidity of vinegar for etching.

INSTRUCTIONS
To substitute for vinegar: 1.2mL (¼ tsp) of citric acid crystals dissolved in 15mL (1T) of water is equivalent to 15mL (1T) of 5% vinegar.

For etching: Add the full packet to 500mL (2c) of 5% or 10% vinegar.

Avoid contact with eyes and skin. Do not ingest or inhale. Keep away from children and pets.

CLEANSING ORANGE

PYSANKA EGGSHELL WASH 1g

Cleansing Orange is used to help remove some of the stronger colours to allow for new colours to "take" on the egg. Please note, Cleansing Orange is not used to colour your eggshell.

INSTRUCTIONS
Pour 295 mL (1¼ cup) of boiling water over contents to dissolve. **DO NOT ADD VINEGAR!** Cool before use. Roll your egg in the solution until you see the original colour come off. Dab dry, and continue the dyeing process.

Store mixed solution in a cool dark place. Do not ingest or inhale. Keep away from children and pets.
