

## ASSEMBLY & SET UP OF THE - MOON GATE

**Includes**

Two people are needed for assembly & set up of Moon Gate Unit. Assemble the complete unit as close to its final location. Once built it is heavy & difficult to move. Assemble the Moon Gate Unit face down on the ground, and follow the steps as shown in pictures :

**STEP - 1 :** Unpack your Moon Gate.  
Check all items with the listing charts above.

## ASSEMBLY & SET UP OF THE - MOON GATE

**STEP - 1 :** Keep arc (A),(B),(E),(F), on ground as shown in figure - 1.  
Note paper labels to help you identify and assemble correct pieces.  
Push smaller tube ends into larger sockets, then align drilled holes.

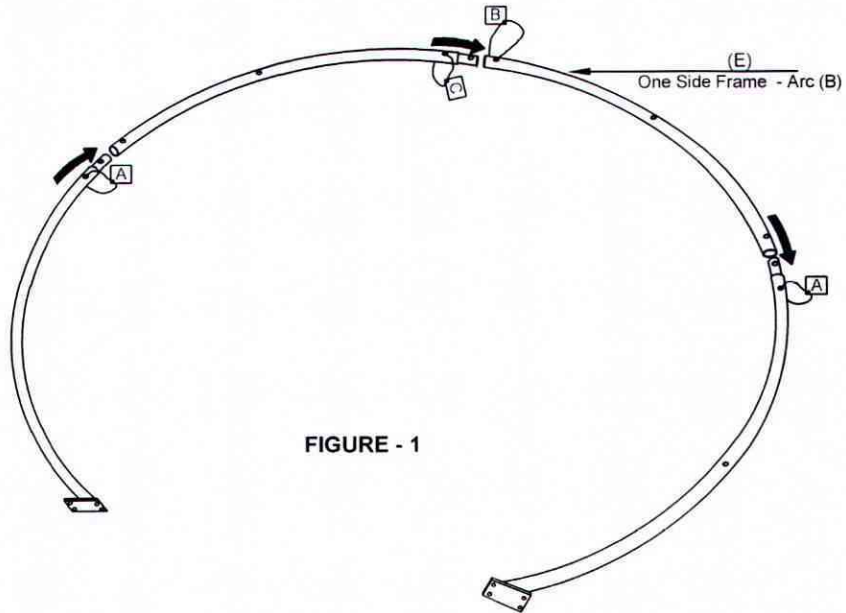

FIGURE - 1

**STEP - 2 :** Take out Pre fitted bolts of joining bars Now insert 12 joining bars through larger holes in joints , until they rest against inside outer walls of tubes. Insert bolts from below into threaded bars and tighten. Refer figure -2 and tighten bolts.
