

PenTest

Drug Detection And Identification

PenTest is an ampoule-based technology that detects trace amounts of drugs as well as bulk amounts. The PenTest was designed for easy carrying and for situations that do not require multiple tests. The PenTest provides law enforcement officers, investigators and private entities distinct advantages for fast and accurate field use.

The PenTest Series is a set of single and multi-drug ampoule-based test kits which can detect the largest range of illicit drugs.

FEATURES:

- ▶ Detects trace drug residues
- ▶ Bulk drug detection and identification
- ▶ Multi-use
- ▶ Will not destroy evidence
- ▶ D4D and Coca tests detect most drugs with two tests

Pen Test Option	Part Number	Drug Detection
