Flair Smart Vent

FEATURES

- Easy retrofit - no need to open up walls to get to ducting like traditional zoning, just swap out the existing registers with Flair Smart Vents
- No wiring - our equipment communicates using a combination of our proprietary radio frequency and Wi-Fi to deliver more even temperatures
- Flexible mounting options that allow you to use the vents in ceilings, walls, and floors
- Rugged steel construction that's tested to last when weight and pressure is applied from objects and people
- Backpressure protection - monitors pressure and prevents too many Smart Vents from being closed at once

SPECS

- 2 x C Batteries (included)
- Battery life: 3-4 years
- Optional 24 VAC wiring
- Lightbar for easy ID
- Requires at least 1 Puck
- Works with all thermostats
