Remove the power adaptor by holding the plug.

Please do not pull the cords.

Handle the device with care.

Do not use abrasive material to clean the device.

TROUBLESHOOT

NEEDLE DOES NOT MOVE OR NEEDLE HESITATES

Check all components are assembled correctly.
Replace dull needle with a new one.

INCONSISTENT OR NO POWER:

Verify that machine is turned on.
Make sure all cords are attached properly.
Try with different speed control or adapter.
Make sure the right Lumi Pen A/B is selected.

MACHINE GETS TOO HOT:

Check speed control and allow 20
minute intervals between each procedure.

If your device does not operate after the above steps have been taken, please contact your distributor for warranty options.

Lumi Digital Device is designed for micropigmentation purpose and for trained professional use only. Neither MEI-CHA or its affiliates assume responsibility or liability for any injuries or damages, resulting, directly or indirectly, from the use of this product.

WARRANTY

MEI-CHA warrants the LUMI DEVICE for a period of ONE (1) YEAR and after the original date of purchase, against defects due to faulty manufacturing or material. If you discover a defect and notify MEI-CHA during the warranty period, MEI-CHA will repair or replace the machine free of charge. This warranty will be void if the machine has undergone repeated dropping, exposure to moisture, or shows signs of misuse that will comprise its functionality.

For warranty claims, please contact your MEI-CHA distributor
or email support at ask@mei-cha.com.
