T2260	16"	Tape – Double sided tape for weatherstripping

## Crawford Performance

### Hardware:

### Tools Needed:

10 MM Socket

8 MM Allen Wrench

3/8" Ratchet

Installation Difficulty: 2/10

## Installation Instructions

1. Remove Plastic cover from door frame. Repeated for both sides.

## Crawford Performance

2. Remove 10 MM bolt as shown (10 MM socket) Repeated for both sides.

## Crawford Performance

3. Prepare both brackets for mounting by installing the factory weather-strips from the plastic covers removed in step 1 to the Crawford mirror pod bracket. Use the provided double sided tape to re-install the rubber weather-stripping

## Crawford Performance

4. Finish bracket prep, by inserting provided button head allen wrench into the upper hole position. Leave the lower hole empty, this will be used to route the pod wire into the car. Slide provided spacer on to allen bolt extruding from the bracket. Spacer should be positioned to the inside of the vehicle.

5. Mount bracket on to vehicle. Leave lower hole open for wiring (8 MM allen wrench). Tighten with 8 MM allen wrench and adjust bracket for correct orientation as you tighten

## Crawford Performance

6. Complete set up with desired light pod and wiring set up. Make sure bracket is secured to vehicle. We Recommend keeping any OEM parts removed just in case this install needs to be undone.

**Thank you for choosing Crawford  
Performance!**

**Please feel free to contact us for any  
questions or comments! We are here to  
help. We understand this is a difficult install  
and we commend you for your efforts.  
Celebrate by cracking a beer and pouring  
one out for your chewed-up arms.**
