WHAT IS NSQUARE

The essence of Hong Kong-based timepiece brand, **NSQUARE**, is about bold creativity and fashionable style. Since its debut in 2016, **NSQUARE** has transformed the mainstream traditional timepiece by injecting its uncompromising style into wrist watches, in a manner that is extraordinary and trend-setting.

Founded in Hong Kong and originally exquisitely created as a Hong Kong brand, **NSQUARE** features an iconic oversized watch face with a curvature that fits snugly onto the Asian wrist for a smooth, comfortable feel.

NSQUARE is committed to its brand promise to deliver reliable quality from its exquisite dial to polished casing, and fine leather strap.

The inspiration for the NICK SERIES

Every piece of art is usually inspired by the things around it. For creative director Nicky, creating, imagining and observing things around him is one important element of watchmaking. In addition to his love for watches, he also loves cars, and his ideals and unconventional ideas are translated into reality in the NICK SERIES.

The design concept of **NSQUARE**'s most representative NICK SERIES comes from the car rim. Watches have always had a close connection with cars. The trendy **NSQUARE** brand has created a stylish, youthful and energetic watch by drawing inspiration from the rim of the car.

The NICK SERIES case is made of stainless steel, and the surface design is like a rim that is rearing to go. It eschews the traditional design of the hour, minute and second hand in favour of creating a unique look with the disc-shaped hour, minute and second hand, completely reversing the usual order of telling time. It is also equipped with a high-quality PVC strap, with more than a dozen colours to choose from.
