**NICK II**

**NSQUARE**

## ***The Bond of NSQUARE & CAR***

NSQUARE has always had a deep fascination with cars and unlimited enthusiasm since its establishment. This is due to our creative director's endless love for cars, whether it is racing cars, super sports cars, or motorcycles. The relationship between the car and speed and time is inseparable; each revolution of the car on the highway represents the speed of the competition, and each rotation of the watch hand is chasing the progress of time. Watches and sports cars, both invariably seek speed and time similarly.

Since the establishment of the brand, many watch series launched by NSQUARE are related to cars. The first is N06 Nick Quartz Watch Series, using the car parts--car wheel concept, launched a series of watches; followed by the N33 Dynamic Race Tourbillon tourbillon with the theme of racing; and the latest in 2021 The launch of the N31 Dynamic Race Automatic is inspired by super sports cars. There are already several watch series that have been inspired by the automotive field. We are actively seeking more possibilities in this field, exploring more unique elements, integrating the unique style of NSQUARE , and creating extraordinary wristwatches, like this new series: NICK II

## ***Committed to EXCELLENT quality, bringing INNOVATIVE breakthroughs***

Since 2016, there have been four watch series inspired by the automotive field. In order to find more have cooperated with Memorigin萬希泉, a well-known local tourbillon brand in Hong Kong. In addition to showing the new design, it also represents the pursuit of excellent quality, constantly improving oneself and seeking higher-quality watch materials to present watches with excellent quality.

Each watch series has a specific theme and takes the relevant elements of the theme as the design inspiration. These watch series show our professionalism and uniqueness, with keen insight to discover unique element, continuous innovation in design, and hope to show or convey a new or different message to you. The new NICK II series is an example of a unique timepiece created and rewritten by NSQUARE .

## ***NICK II Automatic Watch Series***

NSQUARE NICK II series interprets innovative and intriguing watches. Our design team has assembled new ideas and the dullness of traditional time-reading methods to reshape the new definition of watches. Each new series pursues innovation again and again with ingenious design, breaking through the inherent framework, just like the brand founding concept: do not limit yourself or be restricted by frames, BOLDLY show yourself.

## ***Towards a new thinking***

***designed for a new generation of innovative personality and unique thinking***

A new lifestyle requires new thinking. Go beyond the traditional frame to add something new to life. NSQUARE 's new Nick II series goes beyond the traditional frame. The design takes into account various aspects such as watches and related accessories, including various practical details and wear of NICK II. Match the style of clothing and the style conversion brought by the special design of the watch to meet the ever-changing needs in life. Full of NSQUARE 's various innovative and symbolic watches combined with a number of complex devices, such as the exquisite and special sandwich structure laminated design, retrograde clock, and dual-track minute markers, accompanied by a stainless steel case. Leading a brand-new intriguing image, showing a versatile fashion style.

**NSQUARE NICK II Automatic Watch 45mm N12.1 BLACK/YELLOW**

The new design style of NSQUARE NICK II series blends future imagination and fine technology. Square case, disc dial, lively timepiece full of vitality and conflict. The design of the pillars on the four sides of the case is inspired by the anti-collision bracket of the racing car. The four-point support is stable, which means the watch is strong. Viewed from the side, the carefully polished case is more lustrous, the light is refracted between the raised pillars, and the wrist rotates to make the watch shine naturally.

The completely different new style brings more extraordinary imagination to life.

**N12.1 BLACK/YELLOW. Specification**

Movement: Calibre Seiko NH35. Automatic movement.

Functions: Hour, minute, second, 12 hours. Center seconds Dial, dual-track minute design marks.

Crystal: Specially hardened mineral glass with anti-reflective treatment on both sides.

Water resistance: 100 meters.

Strap: Black rubber strap

Buckle: Pin. Satin-finished and polished steel.

Net Weight: 150g

**NSQUARE NICK II Automatic Watch 45mm N12.2 BLACK/RED**

The case structure maintains a consistent and powerful style from the inside to the outside. The diameter of the dial is 45mm wide, and it is made of 316L stainless steel. The calibre of the case is made of Seiko NH35 automatic movement. With hours, minutes, and seconds, 12 hours display and 100 meters waterproof function.

In terms of reading time, it is different from traditional watches. This watch of Nick II has an intriguing design. Its hour hand reads counterclockwise. The minute hand is different from a normal watch but is presented in a dual-track form separately. The disc design of the whole watch and the sandwich structure requires a small amount of effort to read. It is not the traditional 12 hours for you to read at a glance.

**N12.2 BLACK/RED. Specification**

Movement: Calibre Seiko NH35. Automatic movement.

Functions: Hour, minute, second, 12 hours. Center seconds Dial, dual-track minute design marks.

Case: 45mm in diameter. Black PVD coated Stainless steel 316L. Fine-Brushed/Polished. Back with opening in the Specially hardened mineral glass, centered on the balance.

Crystal: Specially hardened mineral glass with anti-reflective treatment on both sides.

Water resistance: 100 meters.

Strap: Black rubber strap

Buckle: Pin. Satin-finished and polished steel.

Net Weight: 150g

**NSQUARE NICK II Automatic Watch 45mm N12.5 BLUE/STEEL**

The most interesting and ingenious dial is inspired by the dashboard of a motorcycle. A motorcycle is smaller than a normal car. Therefore, compared with a car, its dashboard needs to be flexible and integrate the information required by the owner to the greatest extent. The Nick II watch adopts a sandwich perspective structure, which is rare in a watch. The dial, hour dial, and seconds dial are stacked like a sandwich. Like the dashboard of a motorcycle, the multi-layer structure can be flexibly stored but can retain a slim case.

When reading the time, there are multiple layers of structure combination buried under the plane dial, through the skeleton design to enhance the 3D sense of each layer, so that the surface is more layered. Achieved a dazzling, unique, and extraordinary watch.

**N12.5 BLUE/STEEL Specification**

Movement: Calibre Seiko NH35. Automatic movement.

Functions: Hour, minute, second, 12 hours. Center seconds Dial, dual-track minute design marks.
