NSQUARE

CATALOGUE

The Hong Kong watch brand NSQUARE has always been known for its avant-garde and innovative designs. The brand also concurrently strives to increase the infinite possibilities of the brand through joint series. The latest partner of the series is Taiwanese dark fashion designer SKUll 13, who comes with a strong art and graphic design background. This time, two innovative brands comes together in a cross-border cooperation, and debuts with Pirate Storm - the Npower series of wrist watches! NSQUARE has combined the all-new Npower design with the SKUII 13 dark pirate SKUII design, and it is not difficult to find on close inspection several design elements relating to piracy,such as treasure maps, anchors, steering wheels. Pirate Storm manages to blend the artist' s personal touch while combining the characteristics of the two brands. The shape of the wrist watch remains very " NSQUARE ", with its varied lines and dynamic design, and the Ring Lock mechanism at the nine o' clock mark of the case, presents both a professional and three-dimensional touch to the watch. The hour hand is shaped like a giant anchor to break through the conventional shape of the hour hand, while the second hand utilises the form of the steering wheel and with the pirate SKUII printed with the SKUII 13 design, it allows users to witness the crystallisation of the two brands

N15.1
