

[RACERMATIC]

NSQUARE has always favoured the motorsports theme. This year, it specially sponsored the Hong Kong KCMG driver Jim Ka To and launched the new racing Racermatic series of wrist watches. Jim Ka To was scouted by racing companies at the age of fifteen and received full-time training at the French Lafayette Racing School. In 2008, he became the grand champion of the year in the Asian Formula Renault Series in Zhuhai after winning the final two championships with a total score of 308. This year, Jim Ka To will represent KCMG in the Super Taikyu Series 2019 in Japan.

The brand new Racermatic series is made of 44 mm carbon fibre composite material. Its size, as well as the light and hard material fully caters to the needs of the racer, and its streamlined design is filled with elements of the racing sport. The dial design carries through **NSQUARE**'s style of showcasing a new style with every new design. Infused with elements of the racing circuit, **NSQUARE**'s all-new Racermatic series capture that joyful moment when the racer raises both hands to receive the cheers and applause from fans when claiming victory after constant effort and rigorous training. Its straps are made of double high-quality rubber with carbon fibre and woven fabric on the surface, which further blends in the style of the race car with the watch. The Racermatic is equipped with the Japanese Miyota automatic movement and has a power reserve of 41 hours. The ultimate innovative design is dazzling with its streamlined and dynamic appearance.
