

Guitar Type | Bass VI
Pickup Configuration | Three Single Coils
Volumes | 1x 1MEG
Tones | 1x 1MEG
Switch | 4x 2 position slide switches
Orientation | Right handed
Additional items | N/A

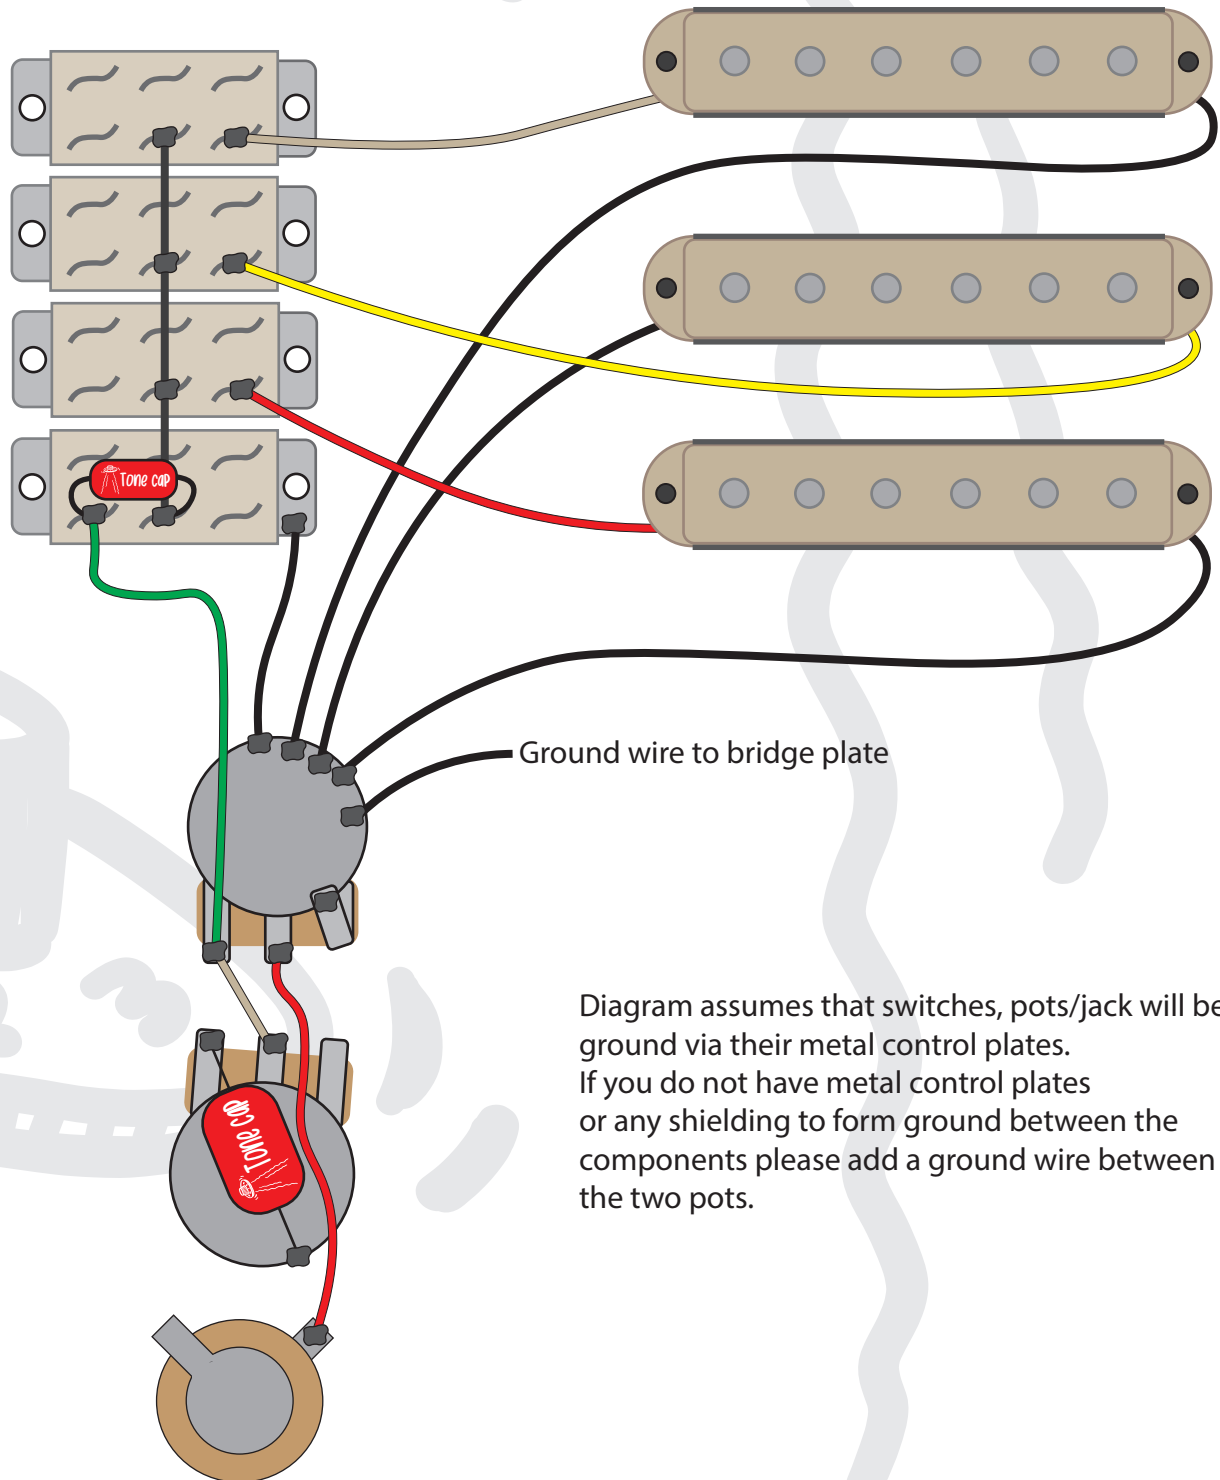

Diagram assumes that switches, pots/jack will be ground via their metal control plates. If you do not have metal control plates or any shielding to form ground between the components please add a ground wire between the two pots.

This diagram has been drawn with traditional 2 conductor braided pickup wires in mind. If your pickup is different to this, then please refer to that manufacturer's wire colour coding prior to installing.

Important note

Please take care of yourself and your guitar when carrying out any guitar wiring work.

James' Home of Tone cannot be held responsible for any damage or injury caused by dangerous or incorrect techniques used. If possible, support your local businesses and have your trusted local guitar tech carry out your re-wire!
