

**Guitar Type | J Bass**  
**Pickup Configuration | Two Single Coil**  
**Volumes | 1x 250k**  
**Tones | 2x 250k**  
**Switch | N/A**  
**Orientation | Right Handed**  
**Additional items | N/A**

Diagram assumes that pots/jack will be ground via the metal control plate.  
If you do not have a metal control plate or any shielding to form ground between pots please add a ground wire between the two pots.

This diagram has been drawn with traditional 2 conductor braided pickup wires in mind. If your pickup is different to this, then please refer to that manufacturer's wire colour coding prior to installing.

**Important note**

Please take care of yourself and your guitar when carrying out any guitar wiring work.

James' Home of Tone cannot be held responsible for any damage or injury caused by dangerous or incorrect techniques used. If possible, support your local businesses and have your trusted local guitar tech carry out your re-wire!
