

Guitar Type | Solderless 'DeLonge' Stratocaster
Pickup Configuration | 1x Humbucker
Volumes | 1x Volume
Tones | N/A
Switch | N/A
Orientation | Right Handed
Additional items | Treble bleed

The Solderless series follows a simple colour code to help guide where to put each pickup wire, your ground wires & jack wire. On the solderless connectors you'll see little colour dots by each lug, the colours are as follows -
Bronze Metallic - For the Bridge Pickup HOT wire
Green Metallic - White wire from jack
Black - For any Ground wire

The Ground wires can be attached to any of the black dotted solderless connector lugs. In case your guitar happens to have any other ground wires coming from body cavity shielding paint etc, which some production models can.

This diagram has been drawn with the Seymour Duncan Invader pickup wire colour codes in mind. If your pickup is different to this, or importantly, a different pickup manufacturer, then please refer to that manufacturer's wire colour coding prior to installing.

Important note

Please visit the 'Wiring diagrams & helpful technical info' page on www.homeoftone.co.uk & read through the Home of Tone harness fitting guide before beginning your harness install. Please take care of yourself and your guitar when carrying out any guitar wiring work as James' Home of Tone cannot be held responsible for any damage caused by dangerous or incorrect techniques used. Or if possible, support your local businesses and have your trusted local guitar tech carry out your install!
