

**Guitar Type | Solderless 'Modern' Strat  
Pickup Configuration | 3x Single Coil  
Volumes | 1x Volume  
Tones | 2x Tone  
Switch | CRL 5 way  
Orientation | Left handed w/Left handed pots  
Additional items | Solderless connections**

The Solderless series follows a simple colour code to help guide where to put each pickup wire, your ground wires & jack wire. On the solderless connectors you'll see little colour dots by each lug, the colours are as follows -

- Silver Metallic - For the Neck Pickup HOT wire
- Blue Metallic - For the Middle Pickup HOT wire
- Bronze Metallic - For the Bridge Pickup HOT wire
- Green Metallic - Jack HOT wire
- Black - For any Ground wire

The Ground wires can be attached to any of the black dotted solderless connector lugs. There is also an additional solderless connector attached on the bridge pickups tone pot. This is for your ground wire from the bridge/vibrato claw along with a spare in case your guitar happens to have a ground wire coming from the body cavity shielding paint, which some models do.

Ground wire from vibrato claw in rear cavity (for bridge ground) connect this wire to any of the ground solderless connections.

**Our diagrams have been drawn with traditional 2 conductor cloth covered and/or outer braided 2 conductor pickup wires in mind unless otherwise stated. Your pickups may have a different wiring style, so consult with your pickup manufacturer for the correct wire type and/or colour coding before installing.**

**Important note**

Please visit the 'Wiring diagrams & helpful technical info' page on [www.homeoftone.co.uk](http://www.homeoftone.co.uk) & read through the Home of Tone harness fitting guide before beginning your harness install. Please take care of yourself and your guitar when carrying out any guitar wiring work as James' Home of Tone cannot be held responsible for any damage caused by dangerous or incorrect techniques used. Or if possible, support your local businesses and have your trusted local guitar tech carry out your install!
