

Guitar Type | Telecaster
Pickup Configuration | Two Single Coils
Volumes | 1x Master Volume
Tones | 1x Bridge Tone
Switch | 3 way blade switch
Orientation | Right Handed
Additional items | No Tone Neck

Diagram assumes that switch & pots will be ground via the metal control plate.
If you do not have a metal control plate or any shielding to form ground between switch/pots please add a ground wire between them.

This diagram has been drawn with traditional 2 conductor pickup wires in mind. If your pickup is different to this, then please refer to that manufacturer's wire colour coding prior to installing.

Important note

Please take care of yourself and your guitar when carrying out any guitar wiring work.

James' Home of Tone cannot be held responsible for any damage or injury caused by dangerous or incorrect techniques used. If possible, support your local businesses and have your trusted local guitar tech carry out your re-wire!
