InShape Prevention Plus Wellness (PPW)

*Preventing Substance Abuse
by Promoting Wellness
among Young Adults*

Protecting Young Adults from Multiple Health Risks

- Research indicates that most US youth and young adults experience multiple co-existing health risks and problems, like physical inactivity, unhealthy eating, lack of sleep, uncontrolled stress and substance use.
- InShape PPW is specifically designed to address these risks in a single program and setting, to cost-effectively improve the “whole health” of young people.
- InShape PPW screens young adults for their current health habits, provides feedback and positive image messages, and helps them set multiple health behavior goals.

“We have been very pleased with the InShape Prevention Plus Wellness program...and we are excited for next year! I feel it is very important to reach this demographic of young adults and there are very few quality programs out there that address this age group.

That is why we are so pleased with InShape PPW, along with the fact that your customer service and relationship with the providers are excellent. I never hear from any of the other vendors that we purchase curriculums from, but I regularly communicate with you and it makes everything much smoother.”

Kristinia Love, Morgan County Substance Abuse Council (MCSAC), Martinsville, IN

“We are pleased with InShape Prevention Plus Wellness. Our young people love it. Excellent EBP.”
