Friendly Tips

- Can this product provide decimal precision?

Yes, and it also provide the unit of lb or kg. Please note the Max 90kg/198lb.

- Can this be used to measure the hand strength in children?

Yes, you could adjust the grip length to suit different hands, but our appendix of the user manual may reference average value for the age of 10 to 99.

- How can I use it to do physical exercise?

No, we do not recommend that since it is a professional measure device. We suggest that you should regular test for the result of your physical exercise.

- Can I set up a different record for the same user?

e.g. I set up No.1, female, age 20, it saved my first record 25.8lb. I need to change it because it was for test. Then I test again, 60.4lb, press DOWN/RECALL button, it will

save the new record.

- Does it can save all the test record?

e.g. I set up No.1, female, age 20, it just only save the one, 60.4lb, which you press DOWN/RECALL button. Then I test 5 times, every time I test the value will compare with the one, 60.4lb I save. Here is the manual test record, I set up user No.1, female, age 20, saving the record, 60.4lb.

Test time	Result/lb	Compare/lb
First	48.8	↓ 11.6
Second	48.0	↓ 12.4
Third	25.8	↓ 34.6
Fourth	45.4	↓ 15.0
Fifth	49.8	↓ 10.6
