CAUTION >>

Before connecting the USB-C Hub, please make sure your device has a Type-C connector, like the new MacBook.

The total power output of the USB-C Hub depends on the output of your device. For example, the new MacBook has 1A of current output. If the combined current needs from all connected devices exceed 1A, the USB-C Hub will automatically power off to protect the MacBook. You can simply unplug the USB-C Hub from the MacBook and plug it in again to make it resume working.
